

WATERBERG DISTRICT MUNICIPALITY

DRAFT 2016/17 IDP

TABLE OF CONTENTS

1. List of Acronyms.....	8
2. Vision, Mission & Values	9-10
3. Foreword by the Mayor	11
4. Executive Summary	12-13
5. The Planning Process	
5.1 Introduction, Framework plan, etc.....	14-19
5.2 Policies and Legislative Frameworks	19-25
5.3 Key aspects of the SONA and SOPA	26-31
5.4 Powers and Functions	32
5.5 Municipal Priority Issues	33
5.6 IDP Process Plan	33-39
5.7 Institutional Arrangements	39-40
6. Situational Analysis	
6.1 Description of the Municipal Area (MAP).....	40-41
DEMOGRAPHICS	
(1) Population Trends	42-44
(2) Age Distribution in terms of gender	44-45
(3) Male and Female	46-48
(4) Employment Profile	49-50
(5) Unemployment Rates.....	50-51
(6) Income levels	51
(7) Education Profile	53-55
(8) People with Disabilities.....	55-56

7. KPA – 1 SPATIAL RATIONALE

7.1 Spatial Analysis58

- (1) Settlement Patterns and Development60
- (2) Spatial Challenges and Opportunities.....60-61
- (3) Hierarchy of Settlement & (5) Growth points Areas61
- (4) Land use composition62
- (5) Land Claims.....63-64
- (6) Illegal occupation of land.....65-66

7.2. Environmental Analysis

Environmental Legislative Framework.....67

- (1) Biophysical Environment67-69
- (2) Climate , Rainfall & Topography.....69-70
- (3) Geology, Landscape & Soil.....70
- (4) Global Warming and Climate Change70
- (5) Water Resources & Mountains73-74
- (6) Air Quality74-76
- (7) Waste Management76-77
- (8) Agriculture and Forestry77
- (9) Heritage Sites, Natural Water bodies & Wetlands71-78
- (10) Chemical spills and hazardous accidents (Disaster Management).....78-79
- (11) Challenges.....79-80

8. KPA – 2 BASIC SERVICE DELIVERIES

WATER AND SANITATION

8.1 A Water

- (1) Water - Blue Drop & Green Drop status.....81-85

(2)Water backlogs	85-86
(3) Water Sources	87
(4) Challenges pertaining to provision of water.	87-88

2. Sanitation

(1) Sanitation	88
(2) Sanitation backlogs	89
(4) Challenges pertaining to sanitation.	90
(5) Provision of Free Basic Water and relevant information in relation to water and sanitation and electricity.....	90-92

8.2 Energy and Electricity

(1) Electricity backlogs	93
(2) Sources of Energy	94
(3) Challenges pertaining to provision of electricity	95

8.3 Roads and Storm Water

(1) Municipal roads and storm water infrastructure	96
(2) State of municipal roads	96
(3) Backlogs on roads and storm water and any other relevant information regarding Roads and Storm water.....	99

8.4 Waste Management

(1) State of refuse removal in Urban and Rural settlements.....	99
(2) Challenges with regard to refuse disposal and any other relevant information regarding	

waste management.....	101
-----------------------	-----

8.5 Public Transport

(1) Modes of transport	103-106
(2) Taxi facilities	106
(3) Transport challenges and any other relevant information regarding public transport.....	106

9. SOCIAL ANALYSIS/ SERVICES

9.1 Housing

107

(1) State of housing in the municipality	107
(2) Backlog in the provision of housing	108
(3) Challenges pertaining to housing provision and other relevant information in relation to housing.....	108

9.2 Education

(1)The number of categories schools	108-109
(2) Backlogs/shortage regarding classroom in the municipality	111
(3) Challenges regarding education and any other relevant information regarding education.....	111

9.3 Health and Social Development

1. Health

(1) Number of Health facilities within the municipality	111-114
(2) State of Prevalence of range of diseases including HIV and Aids and any other relevant information in relation to health and social development.....	115

(3) Challenges.....	116
---------------------	-----

2. Social Development.....	116
----------------------------	-----

Challenges.....	117
-----------------	-----

9.4 Safety and Security

(1) The number of police stations in the municipality	117
---	-----

(2) Shortage/Backlogs & Challenges of safety and security facilities	118
--	-----

(3) Crime categories and Statistics.....	119
--	-----

9.5 Fire and Rescue Services and Disaster and Risk Management

(1) Plans and challenges.....	120
-------------------------------	-----

9.6 Post Office and Telecommunication.

(1) Network infrastructure and challenges.....	120
--	-----

(The number of post office and shortages/backlogs)

9.7 Sports, Art and Culture & Libraries

(1) Sports centres in the municipalities	120
--	-----

(2) Challenges and backlogs with regard to recreational facilities and any other relevant information regarding Sports, Art and Culture.....	123
---	-----

10. KPA 3 – Local Economic Development - 123

(1) Key sectors contributing towards the economy of the municipality	124-128
--	---------

(2) Competitive and comparative economic advantage	128
--	-----

Challenges	131
------------------	-----

11. KPA 4 – Financial Viability

(1) Revenue management	133
(2) Expenditure management & Cash flow management and any other relevant information in relation to finances.....	133
(3) Financial Policies	134
(4) Audited statements	134
Challenges pertaining to Financial Viability.....	135

12. KPA 5 - Good Governance and Public Participation

(1) Relationship with traditional leadership	136
(2) Functionality of ward committees and CDW	137
(3) Availability and functionality of Municipal Public Accounts Committee	137
(4) Intergovernmental Relations	138
(5) Audit, Anti-corruption and Risk management committees	138
(6) Internal Audit	138
(7) Audit Opinion	139

13. KPA 6 - Municipal Transformation and Organisational Development

(1) Institutional Structure – Political and Administrative	141
(2) Performance Management System.....	146
(3) Skills Development	147
(4) Employment Equity plan	149
(5) Retention & succession plan	149

14. SWOT ANALYSIS

1) Strength, Weaknesses, Opportunities and Threads in order to realise its objectives.....	149-152
15. STRATEGY PHASE	152-157
16. ALIGNMENT WITH NATIONAL & PROVINCIAL PLANS.....	158-161
17. 5YRS STRATEGIC OUTCOMES & TARGETS.....	161-164
18. PROJECT PHASE.....	165-190
19. BUDGET SUMMARY.....	191-194
20. INTEGRATION PHASE	194-196
21. APPROVAL PHASE	196

1. ABBREVIATIONS AND ACRONYMS

2. VISION , MISSION, VALUES AND THE SLOGAN

VISION

“We are the energy hub and eco-tourism destination in Southern Africa”

MISSION

“To invest in a constituency of talented human capital who are motivated and innovative to build a sustainable economy in the field of energy, minerals and eco-tourism for the benefit of all our communities.”

VALUES

Values are deeply rooted principles or standards which are universally accepted among the Employees, Councillors and Community members of a municipality and which explicitly guide what they believe, their attitude toward service delivery, and ultimately, how they behave.

The values that drive the attitudes and behaviour of politicians and administration of the Waterberg District Municipality are confirmed as:

<u>Values:</u>	<u>Description:</u>
Commitment	• Commitment is a fundamental cornerstone underpinning our everyday activities – we recognise the value of commitment to fellow employees, to our Councillors and, particularly, to our communities. Forging long-term relationships with our communities, we appreciate they are the lifeblood of our municipality and, in essence, we value them as stake-holders in our future. Thus committed to our clients, naturally we are equally committed to quality and, we also believe in commitment to society as a whole – both the councillors and employees undertake to not only perform their duties in a professional manner, but also actively participate in public life and express their opinions on issues of development in the country in which they live and work
Productivity	• Productivity generally refers to the amount of work someone does in a given amount of time. It consists of the undertaking that to intensify labour-effort and the quality of labour produced at all levels and producing technical innovations. Productivity means doing more with less for maximum impact.
Excellence	• Synonyms for ‘excellence’ include ‘fineness’ ‘brilliance’, ‘superiority’, ‘distinction’, ‘quality’, and ‘merit’. Excellence in all endeavours must be a defining virtue by which the District Wide Area pursues its vision and mission.

Integrity	• Integrity is a concept of consistency of actions, values, methods, measures, principles, expectations, and outcomes. In ethics, integrity is regarded as the honesty and truthfulness or accuracy of one's actions. Integrity can be regarded as the opposite of hypocrisy in that it regards internal consistency as a virtue, and suggests that parties holding apparently conflicting values should account for the discrepancy or alter their beliefs.
Transparency	• Behaviour, actions and information should be visible and available for all to scrutinize. • This includes professionalism which refers to the adherence of employees to honesty and responsibility when dealing with community members including ensuring a level of excellence that goes over and above what is legislatively required. It is about personal ethics, the quality of work produced and the attitude with which it is produced.
Accountability	• To render services to the community with least waste of required resources and ensuring that responsibility is taken for actions so as to be answerable to the community.
Courtesy	• Courtesy involves gentle politeness and courtly manners, which not only covers basic etiquette and decorum but also provided for sophisticated conversation and intellectual skill. To be courteous means to treat other people with dignity.
Professionalism	• High standards of work where professionals promote good to society, act selflessly and abide by code of ethics.

SLOGAN

Considering all the developmental growth needs and opportunities in the district the slogan of Waterberg District Municipality, remains very relevant, and it is therefore proposed that the slogan remains the same. The slogan of Waterberg District Municipality is:

3. FOREWORD BY THE EXECUTIVE MAYOR OF TE WATERBERG DISTRICT MUNICIPALITY CLLR: N.R.MOGOTLANE

The 2011-2016 term of office for the Waterberg District Municipality council has come full cycle and so has the Integrated Development Plan (IDP) which has been the municipality's strategic document for service delivery for the past five years.

As we enter the fifth term of office for local government, we reflected on progress made by the municipality to date in addressing our developmental backlogs, and evaluated our strategic approach to ensure that we are still on track to achieve our vision. We are proud to announce that our IDP is now the strategic driver of both our budget and Performance Management System.

The development of the IDP and the budgeting processes during the past five years included **the** number of public participation programmes. This IDP document is thus a direct result of yet another extensive consultative process. It is an expression of the general interest of our people and a mirror that reflects the holistic wishes of the Waterberg District electorates.

Whilst this document is a legal council adopted manifesto of the Waterberg District Municipality, it is at the same time a flexible and dynamic living document to be used in structuring our debates and engagements with council if we are to deepen democracy and governance in the district.

We must acknowledge with appreciation the efforts and contribution of our councillors, staff, communities and all stakeholders involved in ensuring that we produce a legitimate credible IDP. We are confident that the incoming council will adopt and implement this IDP in an endeavour to fulfil our declared commitment to better the lives of the community of Waterberg.

We are indeed on the go for growth!!

CLLR N.R.MOGOTLANE

EXECUTIVE MAYOR

4. EXECUTIVE SUMMARY

Waterberg District Municipality (WDM) as a category C municipality comprises of Bela –Bela, Lephalale, Modimolle, Mogalakwena, Mookgophong and Thabazimbi local municipalities. It lies on the western part of the Limpopo Province. Informed by its powers and functions, it cannot provide basic services but coordinates supports in line with section 88(2) the Municipal Structures Act to its local municipalities. Within its scope of powers and functions WDM provides disaster management and fire fighting services. For the past 5years(2011-2016) of previous IDP planning cycle the District has been planning together with the local municipalities on processes of IDP and made sure through coordination that the municipalities are rated high during the MECs assessment.

The current council adopted a five year Integrated Development Plan **(2010/11 – 2015/16)** reviewed and implemented it annual in terms of section 34 of the Municipal Systems Act 32 of 2 000 up till **2015/16**. The performance and implementation of IDP and Budget is monitored through the SDBIP. The Drafting of the 2015/16 IDP was initiated through the adoption of IDP Framework/Process Plan which served as blueprint for the development and review of the Integrated Development Plan. As part of the process plan, IDP Representative Forum meetings were convened and chaired by the Executive Mayor as per the Framework/Process plan.

This is a new 5 year plan **(2016/17-2020/21)** which has to be reviewed yearly. The development of an IDP cannot be credible if it excludes public participation. From the beginning of the process various stakeholders are involved as the process unfolds. The complexity of the developmental issues demands that the various stakeholders should not only identify challenges but come up with strategic objectives which inform the projects/programmes to deal with identified challenges. The three spheres of government must not only deliberately adopt an integrated approach towards development, but must also inform one another of programmes in the interest of cooperative government.

After the tabling of the 2016/17 IDP, the municipality will continue to consult broadly in conjunction with the local municipalities in making sure that the services are provided to the communities. Roadshows and public participation will also be part of the processes on reaching out to the communities at large, and will be conducted jointly with the local municipalities.

Over the past five years the IDP document of the district municipality was honoured with a highly credible rated label which must be defended at all costs. A helping hand was even extended to local municipalities, evidenced by the fact that all local municipalities IDPs within the district are highly credible. A careful perusal of our IDP shows that like all the other municipalities, WDM and its local municipalities face challenges of ageing infrastructure, lack of funds to provide bulk services, poor levels of debt collection, lack of regional landfill sites, clean audit, HIV/AIDS pandemic and issues of air quality.

WDM is a tourist destination of choice where we find beautiful tourist attractions such Makapans valley, Marekele National Park, Biosphere etc. Economic opportunities are mining and agriculture, and these can be exploited further when skills of the people are not in line with economic and technological needs. All the economic opportunities are better showcased by the construction of the Medupi power station in the Lephalale Municipality and the development of WEDA (Waterberg Economic Development Agency).

As a bible of the municipality, all and sundry are expected to implement the 2016/17 IDP successfully. The target for a successful implementation lies between 80% and 100% and is achievable through consistent performance assessments of senior managers and the municipal manager.

Overview of alignment of annual budget with IDP

The Constitution mandates local government with the responsibility to exercise local developmental and cooperative governance. The eradication of imbalances in South African society can only be realized through a credible integrated developmental planning process. Integrated development planning must be utilised as a method to plan future development and to find the best solutions to achieve sound long-term development goals.

A municipal IDP provides a five year strategic programme of action aimed at setting short, medium and long term strategic and budget priorities, to create a development platform, which correlates with the term of office of the political incumbents. The plan aligns the resources and the capacity of a municipality to its overall development aims and guides the municipal budget. An IDP is therefore a key instrument which municipalities use to provide vision, leadership and direction to all those that have a role to play in the development of a municipal area. The IDP enables municipalities to make the best use of scarce resources and speed up service delivery. The planning is aimed at involving the municipality, sector departments and the community to jointly find the best solutions towards sustainable development. Furthermore, integrated development planning provides a strategic environment for managing and guiding all planning, development and decision making in the municipality.

The Constitution requires local government to relate its management, budgeting and planning functions to its objectives. This gives a clear indication of the intended purposes of municipal integrated development planning. Legislation stipulates clearly that a municipality must not only give effect to its IDP, but must also conduct its affairs in a manner which is consistent with its IDP. The aim of this revision cycle is to develop and coordinate a coherent plan to improve the quality of life for all the people living in the area, also reflecting issues of national and provincial importance.

The WDM Strategic Objectives are aligned and repositioned to the National Development Plan and the Limpopo Development Plan. It is desirable and recommended that the Strategic Objectives adopted on the 8 – 9 March 2016 by WDM Strategic Session, be embraced by Local Municipalities for their own re-engineering, repositioning and realignment with the WDM high level strategic objectives, National Development Plan, Limpopo Development Plan not forgetting the Back to Basics programme which ensures that all municipalities perform their basic responsibilities and functions without compromise. The programme is built on 5 pillars: 1. Putting people first, demonstrating good governance, delivering municipal services, sound financial management and accounting, and sound institutional and administrative capabilities.

The Back to Basics approach will constitutionalise a performance management system that will recognise and reward good performance, and ensure sufficient consequences and appropriate support for underperformance. The approach will integrate information on municipalities and ensure that the current challenges in the local government sphere, in the short and medium term are addressed.

5. THE PLANNING PROCESS

5.1 Introduction

The Integrated Development Planning (IDP) is a process through which Municipalities prepare strategic development plans for a five-year period. An IDP is one of the key tools for Local Government to cope with its developmental role and seeks to arrive at decisions on issues such as Municipal budgets, land management, promotion of local economic development, and institutional transformation in a consultative, systematic and strategic manner.

According to the Municipal Systems Act (MSA) of 2000, all municipalities have to undertake a process to produce IDP's. As the IDP is a legislative requirement it has a legal status and it supersedes all other plans that guide development at local government level. The budget is the annual plan in rands and cents that sets out the amounts each Department can spend on specific pre-determined items. The legislation governing the drawing up of the budget is the Municipal Finance Management Act (No. 56 of 2003). The relevant Sections of the Act setting out the different timeframes are as follows:

Section 21(1)(b) – The Mayor must at least 10 months before the start of the budget year 1 September table in the Council a time schedule outlining key deadlines for:-

- (i) The preparation, tabling and approval of the annual budget;
- (ii) The annual review of:-
 - The integrated development plan in terms of section 34 of the Systems Act and
 - The budget related policies
- (iii) The tabling and adoption of any amendments to the integrated development plan and the budget related policies.

Section 16(2) – The Mayor must table the annual budget at a Council meeting at least 90 days before the start of the budget year (1 April).

Section 24(1) – The Council must at least 30 days before the start of the budget year (1 June) consider approval of the annual budget.

Section 24(2)(a) – The annual budget must be approved before the start of the budget year (1 July).

The Municipal Finance Management Act provides for an adjustment budget which is a review of the current budget and would normally take place mid-way through the budget cycle i.e. December or January.

THE FRAMEWORK PLAN

The function of the Framework plan is to ensure that the process of the district IDP and local IDP's are mutually linked and can inform each other ensuring co-operative governance as contained in section 41 of the Constitution. The Framework Plan is a co-ordination tool for the district to ensure that interrelated parallel planning processes within the district are coordinated to obtain maximum benefit for the district as a whole.

Various processes within the IDP should be smoothly interlinked to ensure optimal effectiveness as well as ensure this agreement on joint time frameworks that need to be reached between the various local municipalities and the district municipality.

- The District Municipality is in charge of the Framework Plan, which has to be agreed upon by all local municipalities and will be used by the local municipalities in finalising their Process Plans.
- The District Municipality will, through inter-municipal IDP Management Committee (MC) monitor the compliance of the actual IDP process of all municipalities with the Framework Plan. This will ensure that the District Municipality will be in a position to undertake corrective action in time if a Local Municipality fail to adhere to the Framework Plan and the timeframes contained therein.
- Each Local Municipality will, however, be responsible for monitoring its own process plan and ensure that the Framework Plan is being followed as agreed.(Bela-Bela Local Municipality(LIM366),Lephalale Local Municipality(LIM362), Modimolle Local Municipality(LIM365), Mogalakwena Local Municipality(LIM367),Mookgophong Local Municipality(LIM364), Thabazimbi Local Municipality(LIM361). **(Each municipality has an IDP Manager to steer the local IDP process within that municipality.)**

FRAMEWORK PROGRAMME

This process is dynamic and could be adapted to accommodate the consultation process which is circumstantial of nature. The total programme spans over an expected ten (10) month period and has been categorised as:

Phase 0 – Preparation
 Phase 1 – Analysis
 Phase 2 – Strategies
 Phase 3 – Projects
 Phase 4 – Integration
 Phase 5 – Approval

MECHANISMS AND PROCEDURES FOR ALIGNMENT AND PARTICIPATION

The existing IDP Representative Forum will continue to be used as a mechanism for community and stakeholder participation. IDP representative forum meetings will be held four times per financial year at the District level, but however local municipalities ward conferences, consultation, imbizos, and representative forums will be used by both District and local municipalities to deepen community and stakeholder participation.

a. Mechanisms and procedures for alignment

Alignment is at two levels, horizontal and vertical. Largely the two levels influence each other. Though one can be done independent from each other, if this is done, a clear picture of what is happening will not be achieved. The strategy that we are going to follow applies to both horizontal alignments between the District and Local Municipalities, and vertical, between the municipalities, the province and the national departments and parastatals.

b. Management of alignment.

For both alignment types, horizontal and vertical, the main responsibility lies with the District Municipality. The role of the IDP Manager at the District level is of utmost importance. IDP unit and external facilitators could be used to support the alignment process. However, the provincial department of local government and office of the Premier play an important role as co-ordinator to ensure alignment above District level and between districts and departments within the Province.

c. Functions and context for public participation

Four major functions can be aligned with the public participation process namely:

- Needs orientation;
- Appropriateness of solutions;
- Community ownership;
- Empowerment;
- Performance Monitoring

In the preparation of the IDP/Budget/PMS, the public participation process has to be institutionalised in order to ensure all residents have an equal right to participate.

d. Mechanisms for participation

- i. IDP/Budget/PMS Representatives Forum (RF), Imbizos / Roadshows
- ii. Various Fora
- iii. Media
- iv. Information Booklets

PRINCIPLES FOR MONITORING OF THE PROCESS PLAN AND AMENDMENT OF THE FRAMEWORK

It is expected of the District and all the local municipalities to adhere to the timeframes as set out in the programme above. Any municipality that is not able to meet the deadline should timeously report to the IDP Manager at the District. At the same length, if the District is not going to be able to meet a deadline, the IDP Manager should inform the municipalities on time. This is the principle that should also be adhered and respected by all municipalities including the district.

In terms of monitoring, municipalities would be expected to submit and make a presentation to the District Management Committee (MC) which is comprised of all the IDP managers within the District. That is, the IDP managers of Modimolle, Bela-Bela, Mookgophong, Mogalakwena, Thabazimbi, and Lephalale municipalities. The DMC will hold its meeting as per the above schedule.

ROLES & RESPONSIBILITIES

The District Municipality will confirm information of the role players in the IDP/Budget/PMS Process by removing/adding to the list of stakeholders from the database established in the previous IDP/Budget/PMS Processes. A significant change will relate to details of Councillors and some of the officials. The organizational structures that were utilized during the IDP preparation and previous review processes will be revived for the purpose of this IDP/Budget/PMS Process.

The main roles and responsibilities allocated to each of the role players is set out in the following table:

Executive Mayor	• Manage the drafting of the IDP; • Assign responsibilities in this regard to the Municipal Manager; • Submit the draft Framework Plan and Process Plan to the Council for adoption; • Submit the draft IDP to the Council for adoption and approval;
Municipal Manager	• Preparation of Framework Plan; • Preparation of the Process Plan; • Day-to-day management and coordination of the IDP process in terms of time, resources and people, and ensuring: • The involvement of all relevant role-players, especially officials; • That the timeframes are being adhered to; • That the planning process is horizontally and vertically aligned and complies with national and provincial requirements; • That conditions for participation are provided; and • That the outcomes are documented. • Chairing the IDP Steering Committee;

Chairing the IDP Steering Committee;

IDP Steering Committee	The IDP Steering Committee comprises of a technical working team of dedicated officials who support the Municipal Manager /Strategic Manager to ensure a smooth planning process. The Municipal Manager is responsible for the process but often delegates functions to the officials that form part of the Steering Committee. Chairperson: Municipal Manager Secretariat: The secretariat for this function is provided by the IDP Members: Heads of Departments (HODs) The IDP Steering Committee is responsible for the following: • Commission research studies; • Consider and comment on: • Inputs from subcommittee(s), cluster teams; • Inputs from provincial sector departments and support providers. • Process, summarise and draft outputs; • Make recommendations to the Representative Forum; • Prepare, facilitate and minute meetings • Prepare and submit reports to the IDP Representative Forum
IDP Representative Forum	The IDP Representative Forum comprises of WDM and its local municipalities, representatives from sector departments, parastatal bodies, NGOs, business people, traditional leaders, and other interested organized bodies. Chairperson: The Executive Mayor or a nominee Secretariat The secretariat for this function is provided by the IDP Unit Membership: Invitations are submitted to the same members as the previous year, including the representatives of the consultative fora.

District IDP Management Committee(MC) AND Social, Institutional &Transformation and Infrastructure & LED Clusters, Climate change Committee Government Departments	➤ Monitor, evaluate progress & provide feedback. ➤ Provide technical guidance to IDP process at district level. ➤ Ensure and maintain Alignment. ➤ Standardise the planning process. ➤ Recommends corrective measures. ➤ Ensure both vertical and horizontal alignment ➤ Integrated planning and implementation co-ordination • Provide data and information. • Budget guidelines. • Alignment of budgets with the IDP

- National Forest Act (1998)

Tourism

- White Paper on the Development and Promotion of Tourism, 1996 Tourism in Gear, 1997

POLICY AND LEGISLATIVE FRAMEWORK

IDP is a management tool for assisting municipalities in achieving their developmental mandates. Every municipality is required by law to develop and adopt its IDP through the legal frame work provided. The following pieces of legislations outline the development and implementation of the IDP.

A.1. CONSTITUTION OF THE REPUBLIC OF SOUTH AFRICA (Act 108 of 1996)

Section 151 of the Constitution, states that developmental local government should make provision for a democratic and accountable government for communities. It also encourages municipalities to ensure the provision of services to communities in a sustained manner in order to promote social and economic development. Local government must promote a safe and healthy environment and encourage community involvement in matters of local government such as municipal transport, municipal health services, municipal roads, and municipal parks and recreation. Section 152 of the Constitution says that local government should provide democratic and accountable government for local communities. It should ensure the provision of services to communities in a sustainable manner, promote a safe and healthy environment as well as encourage the involvement of communities and community organizations in matters of local government. Section 153 of the Constitution states that each municipality should structure and manage its administration, budgeting, and planning processes to give priority to the basic needs of the community and to promote the social and economic development of the community. Municipalities should participate in national and provincial programmes and infrastructure development programmes. Section 153 of the Constitution also encourages municipalities to involve communities in their affairs.

A.2. WHITE PAPER ON TRANSFORMING PUBLIC SERVICE DELIVERY (BATHO PELE WHITE PAPER OF 1997)

The paper flows from the White Paper on the Transformation on Public Service (1995). In terms of the White Paper, transforming service delivery is identified as one of government's priority areas. The White Paper is primarily about how public services are provided, and specifically about the efficiency and effectiveness of the way in which services are delivered. It "seeks to introduce a fresh approach to service delivery, an approach which puts pressure on systems, procedures, attitudes and behaviour within the Public Service and reorients them in the customer's favour, an approach which puts the people first". The introduction of the concept of Batho Pele, which means putting people first, provides the following eight service delivery principles in an attempt to ensure that the people, as customers to the public institutions, come first. Furthermore, the adoption of the concept "Customer" implies:

- Listening to their views and taking account of them in making decisions about what services are to be provided;
- Treating them with consideration and respect;
- Making sure that the promised level and quality of services is always of the highest standard; and
- Responding swiftly and sympathetically when standards of service fall below the promised standard.

In giving effect to the notion of treating the recipients of government services as customers, the White Paper articulates that public sector, including the local government sphere, should be governed by the following ethos (principles):

- Consultation: citizens should be consulted about the level and quality of the public service they receive and wherever possible, should be given a choice about the services that are offered;
- Service Standards: Citizens should be told what level and quality of public services they would receive so that they are aware of what to expect;
- Access: All citizens should have equal access to the services to which they are entitled;
- Courtesy: Citizens should be treated with courtesy and consideration; Information: Citizens should be given full, accurate information about the public services that are entitled to receive;
- Openness and transparency: Citizens should be told how the national and provincial departments are run, how much they cost, who is in charge;
- Redress: If the promised standard of service is not delivered, citizens should be offered an apology, a full explanation and a speedy and effective remedy,
- when complaints are made, citizens should receive a sympathetic, positive response;
- Value for money: Public services should be provided economically and efficiently in order to give citizens the best possible value for money.

A.3. WHITE PAPER ON LOCAL GOVERNMENT (1998)

The White Paper on Local Government (1998) paper views that Integrated Development Planning as a way of achieving developmental government. The Integrated Development Planning intends to:

- Align scarce resources around agreed policy objectives;
- Ensure integration between sectors with local government;
- Enable alignment between provincial and local government and
- Ensure transparent interaction between municipalities and residents, making local government accountable (RSA, 1998, 18).

The paper establishes a basis for developmental local government, in which, “local government is committed to working with citizens and groups within the community to find sustainable ways to meet their social, economic and material needs and improve the quality of their lives”. It also encourages public consultation on policy formulation and in the monitoring and evaluation of decision – making and implementation.

A.4. MUNICIPAL SYSTEMS ACT (Act 32 of 2000, as amended)

The Act regulates the IDP. It requires the municipality to undertake developmentally oriented planning so as to ensure that it strives to achieve the objectives of local government set out in Section 152 and 153 of the Constitution. Section 25 (1) requires the Municipal Council, within a prescribed period after the start of its elected term, to adopt a single, inclusive and strategic plan for the development of the municipality which:

- Links, integrates, co – ordinates and takes into account proposals for the development of the municipality;
- Aligns the resources and capacity of the municipality with the implementation of the plan;
- Forms the policy framework and general basis on which annual budgets must be based;
- Complies with the provisions of Chapter 5, and
- Is compatible with the national and provincial department plans and planning requirements binding on the municipality in terms of legislation.

Section 26 of the Act further outlines the core components of the integrated development plan of a municipality. It requires the integrated development plan of the municipality to reflect:

- The municipal council's vision for the long term development of the municipality with special emphasis on the municipality's most critical development and internal transformation needs;
- An assessment of the existing level of development in the municipality, which must include an identification of communities which do not have access to basic municipal services;
- The council's development priorities and objectives for its elected term;
- The council's development strategies which must be aligned with any national or provincial sector plans and planning requirements binding on the municipality in terms of the legislations;
- The council's development strategies which must be aligned with any national or provincial sector plans and planning requirements binding on the municipality in terms of the legislations;
- A spatial development framework which must include the provision of basic guidelines for a land use management system of the municipality;
- The council's operational strategies;
- Applicable disaster management plan;
- A financial plan, which must include budget project for at least the next three years, and
- The key performance indicators and performance targets determined in terms of section 41.

A.5. MUNICIPAL FINANCE MANAGEMENT ACT (ACT 56 OF 2003)

The Municipal Finance Management Act (56 of 2003) was promulgated to secure sound and sustainable management of the financial affairs of municipalities and other institutions in the local sphere of government. The Act provides a mandatory provision that relate to financial and performance management. Section 2 of the

Act stipulates that the object is to secure sound and sustainable management of the financial affairs of the local government institutions to which this Act applies by establishing norms and standards for:

Ensuring transparency, accountability and appropriate lines of responsibility in the fiscal and financial affairs of municipalities and municipal entities;

- The management of revenues, expenditures, assets and liabilities and the handling of financial dealings, budgetary and financial planning processes;
- The coordination of those processes with those of the other spheres of government,
- Borrowing;
- Supply chain management; and
- Other financial matters.

Waterberg District Municipality's involvement in the budget process is to ensure compliance with the provision of the Municipal Finance Management Act. It is crucial that the IDP review process facilitate community participation, provide ward level information, encourage discussion on priorities and provide an opportunity for feedback.

The main strategic outputs of the budget reform are to ensure:

- Modernizing financial management and improving accountability;
- Multi – year budgeting;
- Deepening and improving the budget preparation process, by involving the political leadership and community;
- Ensuring that the IDP and budgets are linked, and that the IDP takes account of budgetary resources, and contain proper capital and maintenance plans;
- Improving the in – year implementation of the budget; and
- Improving the auditing and performance reporting after the financial year has ended.

A.6. TRADITIONAL LEADERSHIP AND GOVERNANCE FRAMEWORK AMENDMENT ACT (ACT 41 of 2003)

This Act makes clear the role of the traditional leadership in the democratic and co – operative governance. The Act envisages an active involvement of the traditional leadership in the formulation and the implementation of the integrated development plans. Section 4 of the Act provides for the establishment of traditional councils that should:

- Support municipalities in the identification of community needs;
- Facilitate the involvement of the traditional community in the development or amendment of the integrated development plan of a municipality in whose area that community resides;
- Participate in the development of policy and legislation at the local level; and
- Promote the ideals of co – operative governance, integrated development planning, sustainable development and service delivery to promote indigenous knowledge systems for sustainable development and disaster management.

Section 5 (2) of the Act affirms that any partnership between a municipality and a traditional council must:

- a. Be based on the principles of mutual respect and recognition of the status and roles of the respective parties; and
- b. Be guided by and based on the principles of co – operative governance.

One village resides in traditional authority governed area. To this effect, Bela Bela Municipality has involved the traditional leader in both the IDP review process and any other developmental matter involving their areas of governance.

A.7. INTER – GOVERNMENTAL RELATIONS FRAMEWORK ACT (ACT 13 of 2005)

The Act is a response to the limited successes in the alignment efforts among the three spheres of government. The Act creates a framework to support intergovernmental cooperation and coordination as required by the Constitution in its definition of “cooperative governance”. It provides for the obligation of all spheres to participate in the planning processes of the municipality and in turn allow their own planning processes to be influenced by the municipal IDP’s. Municipal IDPs are regarded as important planning frameworks to integrate both the national and provincial programme in specific local area. The municipality is participating in the district – planning forum, district – municipal managers’ forum, district – mayors forum and as well as in the Premier’s Intergovernmental Forum. The participation is aimed at ensuring proper alignment and coordination of local, district and provincial plans. The Act establishes structures and processes that enhance inter – governmental planning and monitoring processes for local, provincial and national spheres of governance.

A.8. PERFORMANCE MANAGEMENT SYSTEM

A municipality’s Performance Management System entails a framework that describes and represents how the municipality’s cycle and processes of performance, planning, measurement, review, reporting and improvement will be conducted, organized and managed, including determining the roles of the different role – players.

It is critical that political leadership, managers and staff be involved to ensure that the municipality embraces the IDP and its implementation – which is performance management in practice. Implementing the processes and systems needed to operationalise the IDP will determine the ultimate success of the municipality. The following needs to be taken into consideration when starting to implement the IDP:

- Plan for performance by clarifying objectives and outputs to be achieved;
- Clarify performance expectations by setting standards and targets for each indicator to assess and evaluate performance in practice;
- Monitor, measure, assess and evaluate performance, and
- Link strategic priorities, goals and objectives agreed in the IDP by
 - Enabling staff to understand how their job contributes to the aforementioned;
 - Ensuring resources are directed and used in efficient, effective and economic ways by each person in the municipality;
 - Including communities and other stakeholders; decision – making, monitoring and evaluation;
 - Learning from experience and use it to continuously improve what’s achieved, and maintaining transparency and accountability and promoting good governance articulated in the Batho Pele principles.

5.3 A. STATE OF THE NATION ADDRESS 2016 (SONA)

A resilient and fast growing economy is at the heart of radical economic transformation agenda and National Development Plan. When the economy grows fast it delivers jobs. Workers earn wages and businesses make profits. The tax base expands and allows government to increase the social wage and provide education, health, social grants, housing and free basic services - faster and in a more sustainable manner.

Our economy has been facing difficulties since the financial crisis in 2008. The prices of gold, platinum, coal and other minerals that SA sell to the rest of the world have dropped significantly and continue to be low. The economies of two of our partners in BRICS: Brazil and Russia - are expected to contract this year. The third, China, will not register the kind of robust growth that it is known for because our economy is relatively small and open; it is affected by all of these developments. Our economy is also affected by domestic factors such as the electricity constraints and industrial relations which are sometimes unstable. Government is developing a One Stop Shop/Invest SA initiative to signal that South Africa is truly open for business, in partnership with the private sector. There has been an establishment of an Inter-Ministerial Committee on Investment Promotion which will ensure the success of investment promotion initiatives.

SA Tourism will invest one hundred million rand a year to promote domestic tourism, encouraging South Africans to tour their country. The draft migration policy will be presented to Cabinet during the course of 2016. We need to empower SMMEs to accelerate their growth. Access to high-quality, innovative business support can dramatically improve the success rate of new ventures. The department of small business development was established to provide such targeted support to small business. Economic transformation and black empowerment remain a key part of all economic programmes of government. One of our new interventions is the Black Industrialists Scheme which has been launched to promote the participation of black entrepreneurs in manufacturing.

The nine point plan put lined during the State of the Nation Address in February 2015 to respond to sluggish growth:

- Revitalisation of the agriculture and agro-processing value-chain;
- Advancing beneficiation adding value to our mineral wealth;
- More effective implementation of a higher impact Industrial Policy Action Plan;
- Unlocking the potential of SMME, co-operatives, township and rural enterprises;
- Resolving the energy challenge;
- Stabilising the labour market;
- Scaling-up private-sector investment;
- Growing the Ocean Economy;
- Cross-cutting Areas to Reform, Boost and Diversify the Economy;
- Science, technology and innovation
- Water and sanitation
- Transport infrastructure
- Broadband rollout
- State owned companies.

Significant progress in the implementation of the plan has been made. Progress has been made to stabilise the electricity supply and this has brought relief for both households and industry alike. Government has invested eighty three billion rand (R83 billion) in Eskom which has enabled the utility to continue investing in **Medupi** and Kusile, while continuing with a diligent maintenance programme. Additional units from Ingula power station will be connected in 2017, even though some of them will begin synchronisation this year. The multiple bid windows of the Renewable Independent Power Producer Programme have attracted an investment of one hundred and ninety four billion rand. This initiative is a concrete example of how government can partner with the private sector to provide practical solutions to an immediate challenge that faces our country.

In 2016, government will select the preferred bidders for the coal independent power producer. Request for Proposals will also be issued for the first windows of gas to power bids. The nuclear energy expansion programme remains part of the future energy mix. A plan to introduce nine thousand six hundred megawatts of nuclear energy in the next decade, in addition to running Koeberg Nuclear Power Plant is in place. Test will be done with regard to the market to ascertain the true cost of building modern nuclear plants.

Our government through the Department of Trade and Industry introduced a number of incentives in the past few years to boost investments in the manufacturing sectors especially textiles, leather and the automotive sectors and there is progress that has been made in these sectors. The incentives for the automotive sector have attracted investments of over twenty five billion rand over the last five years. We welcome key investments from Mercedes, General Motors, Ford, Beijing Auto Works, the Metair group, BMW, Goodyear and VW. The clothing and textile sector has also been successfully stabilised after a difficult few years. Multinational companies such as Nestle, Unilever Samsung and Hisense have also affirmed South Africa as a regional manufacturing hub. They have retained and expanded their investments in new plants. The progress made in manufacturing has certainly demonstrated that the incentive programmes are effective and attractive to investors.

Agri-Parks programme, aimed at increasing the participation of small holder farmers in agricultural activities. Construction has begun in at least five agriparks, which are: Westrand in Gauteng, Springbokpan in North West, Witzenberg in Western Cape, Ncora in the Eastern Cape and Enkangala in Mpumalanga.

Land reform remains an important factor as we pursue transformation. Regulation of Land Holdings Bill which would place a ceiling on land ownership at a maximum of 12 000 hectares and would prohibit foreign nationals from owning land. They would be eligible for long term leases. The draft Bill will be presented to Cabinet in the first semester of the year. The re-opening of land claims for people who had missed the 1998 deadline have been announced. The number of new land claims that have been lodged stood at close to one hundred and twenty thousand as of December 2015.

The building of water infrastructure remains critical so that we can expand access to our people and industry. The first phase of the Mokolo and Crocodile Water Augmentation project in Lephalale area in Limpopo is fully operational. It will provide 30 million cubic meters of water per annum. To curb water wastage, the Department of Water and Sanitation has begun its programme of training fifteen thousand young people as artisans.

The Department of Science and Technology will finalise the Sovereign Innovation fund, a Public private funding partnership aimed at commercialising innovations that are from ideas from the public and the private sectors. Government will fast track the implementation of the first phase of broadband roll-out to connect more than five thousand government facilities in eight district municipalities over a three year period. Funding to the tune of 740 million rand over a three year period has been allocated in this regard.

On the health front, the life expectancy of South Africans for both males and females has significantly improved and is currently 62 years across genders, which is an increase of eight and a half years since 2005. The HIV policy turnaround in 2009 led to a massive rollout of HIV testing and treatment for 3.2 million people living with the virus. This has contributed immensely to healthier and longer lives for those infected. We acknowledge the contribution of partners in the South African National Aids Council which is chaired by the Deputy President.

Our next step is to revive prevention campaigns especially amongst the youth. The Minister of Health will soon announce a major campaign in this regard. The state-owned pharmaceutical company, Ketlaphela, has been established. The company will participate in the supply of anti-retroviral drug to the Department of Health from the 2016/17 financial year. Meanwhile, the White Paper on National Health Insurance was released in December aimed at improving health care for everyone in South Africa.

The South African Police Service is undergoing a turnaround and has adopted the Back to Basics approach to management to rebuild the organisation and to improve performance at all under-performing police stations.

China announced investments of fifty billion US dollars of which South Africa will receive ten billion US dollars for infrastructure, industrialisation and skills development. Over 2000 EU companies operate within South Africa creating over three hundred and fifty thousand jobs. South Africa's relations with the USA and Canada continue to strengthen, especially in the areas of economy, health, education, energy, water, safety and security, capacity building and the empowerment of women. The renewal and expansion of the African Growth and Opportunity Act (AGOA) provides a platform for the enhancement of industrialisation and regional integration. All outstanding issues around AGOA are being attended to.

In the National Development Plan, we set our aspirational target growth of five per cent per year, which we had hoped to achieve by 2019. The tough global and domestic conditions should propel us to redouble our efforts, working together as all sectors. In this regard, it is important to act decisively to remove domestic constraints to growth. Given the economic conditions SA is facing, it is clear that the growth target at the time we had hoped to achieve will not be achieved. Working together to change the local conditions and turn the situation around a lot can be done.

5.3B . LIMPOPO STATE OF THE PROVINCE ADDRESS 2016 - SOPA

Provincial Development Plan, Limpopo Development Plan (LDP) has been finalised, and will serve as a blue print to guide and put the province on a higher trajectory of economic growth and development, The Limpopo Development Plan reflects shared vision and strategic imperatives towards poverty reduction, elimination of social inequality and a creation of sustainable jobs in our province. This will be achieved through sustainable socio-economic, infrastructural and institutional development, in order to achieve radical economic and social transformation.

With regard to economic development and transformation, strategic programmes across the mining, agriculture and tourism sectors were identified. The goal is to ensure an industrialization programme through mineral beneficiation, development of agro-processing cluster and logistics. There is a re-affirmed role of SMME's and Cooperatives in the productive sectors as a critical component towards radical economic transformation.

The Limpopo Development Plan has also identified specific economic regions that have a significant potential to accelerate the industrialisation process in the province. These include, but not limited to Polokwane, Lephalale, Tubatse, Tzaneen and Makhado-Musina corridor as the areas of priority in terms of integrated human settlements and economic development. The following significant economic projects and infrastructure investments projects are being implemented in some of these economic regions: The Presidential Strategic Infrastructure Programme targeting both **Waterberg** and Sekhukhune District Municipalities, and the envisaged Special Economic Zones earmarked for implementation in both Greater Tubatse and Musina Local Municipalities.

Limpopo Development Plan also acknowledges that a critical condition for job creation is improved levels of education and skills development. Human Resource Development is therefore identified as one of the key priorities. In this regard, we have identified the required skills to support both social and economic development in the province. Strategic partnerships between government, the private sector and educational institutions to ensure a strategic coordination of human resource development in the province have been developed.

Preparations for the launching of the Limpopo Human Resource Development Council are at an advanced stage. The Council will be advising the Provincial Government on matters related to skills development.

Underpinning the Limpopo Development Plan is 10 High-Level Development Targets to be attained by 2020. These targets are:

- the achievement of economic growth rate of 3% revised in the light of the current performance of the global economy
- the creation of 429 000 jobs
- Increased access to basic water from 83% in 2014 to 90%
- Increased access to electricity supply from 83% in 2014 to 90%
- Increased access to sanitation from 43% in 2014 to 50%
- Increased Matric Pass Rate from 72% in 2014 to at least 80%
- Increased Geographic Gross Product contribution to the national GDP from 7.15% in 2014 to 9%;
- Reduction of the unemployment rate from 16.9% in 2014 to 14%
- Increased average life expectancy from 58.3 in males in 2014 to 60, and 62.5 in females in 2014 to 65, and above all
- Reduction of inequality in terms of Gini-Coefficient from 0.61 in 2014 to 0.50

Ten (10) High-level Development targets require a detailed programme of action and appropriate resource allocations for their successful implementation. Sector departments, Municipalities and other State Institutions must go review and align their strategic plans and budget with this Limpopo Development Plan, and also to provide an annual feedback to the people of our province on the implementation of this Plan.

Limpopo has become a destination of choice for international investors. During our trade and investment mission to the People's Republic of China in October 2014, memorandums of Agreement with biggest investors were signed. The first memorandum of Agreement was signed with Hong Kong Mining Exchange Company (Hoi Mor) for the establishment of South Africa Energy Metallurgical Base Project. This Project whose investment value is estimated at R38.8 billion, will be based in the Musina Special Economic Zone, and will create 19 000 direct jobs over a period of three years. The Hoi Mor investment will result in beneficiation

that integrates various resources and reduce the export of raw materials in favour for exporting beneficiated goods. In the same vein, the South Africa's Women Investment Holdings has entered into a joint venture agreement with Jidong Development Group and China Africa Development Fund for a R1.65 billion investment into cement manufacturing which will be based in Thabazimbi. The construction started in 2014 and is due to be completed next month. These investments will add value to efforts of expanding the productive capacity of our economy.

The recent Labour Force Survey by Statistics South Africa indicates that employment in the province has increased by 67 000 more permanent jobs. In the last quarter alone, the province has created 29 000 permanent jobs. There is a reduction of the unemployment rate by a percentage point from 16.9 to 15.9 in the intervening period. The expanded unemployment rate declined on a quarterly basis by 1.2 percentage points to 37.2%. This is faring better, in creating more decent and sustainable.

Agriculture remains one of the key drivers for the development and growth of our economy. It is in this context that we are putting in place deliberate measures and focused investment in the sector. Madzivhandila and Tompi Seleka Agricultural Colleges have been opened at the beginning of this year and the colleges are now fully functional and operational with the student enrolment of no less than 140. The curriculum content has been restructured and developed to produce agricultural economists, extension officers, pasture and soil scientists, agronomists and horticulturalists.

The curriculum is also integrated with other disciplines offered by the University of Limpopo and the University of Venda. This will also create a platform for the sharing of information and skills. The farmers, who are already practicing, will be able to go to these colleges to increase their knowledge and skills base.

In the next Financial Year, the focus will be on the revitalization of irrigation schemes, construction of pack houses and revival of existing Fresh Markets.

Road infrastructure is a strategic stimulant for economic growth and development. It is in this context that we are investing more resources to roads infrastructure development and maintenance. We have put aside an amount of R3.187 billion to upgrade from gravel to tar 18 projects over the next three years. These projects will include the so-called "Bermuda" roads that were started in the past and were not concluded due to budgetary constraints. The distance to be covered will be no less than 344 km.

In order to capacitate and equip Educators and Curriculum Advisors with a deeper knowledge of both content and teaching methodology, particularly in Mathematics, Science, Technology, Commerce and Language subjects, over 1060 Educators have been trained through the Continuous Professional Development Programme. Plans for this year is to place a further 300 Educators and 80 Curriculum Advisors on the same training programme. Our commitment to early childhood development has seen us increase Public Primary Schools that offer Grade R to 2 340, and we intend increasing this number to 2 485 in the next Financial Year. Provision to expand Scholar Transport to cover no less than 21 000 learners have been made.

Provision of all no-fee paying schools with nutritional meals will continue, because leaner attendance continues to improve as a result of this programme. The government will also ensure the eradication of inappropriate sanitation facilities and unsafe school infrastructure. This will also include repairs to storm damaged schools and provision of new schools, new classrooms, laboratories, libraries and more importantly, water. This will ensure that our children learn in a more conducive environment.

R145 million have been spent to purchase and repair critical equipment's for the hospitals in need. 110 students were sent to Cuba to study medicine last year and currently there is advertisement running inviting interested young people for another opportunity to study medicine in Cuba. The fight against HIV/AIDS is well on track. In the same vein, we implore on all Mayors of our municipalities to consider this measure to intensify the fight against HIV/AIDS.

In collaboration with the national Department for Social Development, we are making inroads in the fostering sustainable livelihoods and poverty alleviation. Thus far 12 Community Nutrition Development Centres empowered to manage and distribute food to needy individuals across the province. This initiative will benefit no less than 2 400 people. In the next financial year, it will increase Community Development Centres from 12 to 17 in the province, in order to improve conditions of those living below the poverty line, improving conditions of those living below the poverty line.

Local government is the strategic centre of gravity in terms of direct delivery of basic services to our people. Local government audit outcomes: The number of disclaimers has decreased from 9 in 2012/13 to 6 in 2013/2014. Whilst the number of qualified audit opinions from 18 in 2012/13 to 10 in 2013/14. There is an increase in the unqualified audit opinions from 0 in 2012/13 to 12 in 2013/14.

There's still the challenge of municipalities which are unable to spend their Municipal Infrastructure Grant (MIG). By December last year we had only managed to spend a mere 26.2% of the allocated MIG budget. This is obviously unacceptable. The Department of CoGHSTA and the Provincial Infrastructure Development Hub that we have established in the Provincial Treasury last year are working on a mechanism to help municipalities to improve in this regard.

The implementation of the Back-to-Basics Programme as launched by the president must also be implemented without delay. Programme to provide shelter to our people remains on track. Over the past 21 years of democracy, in Limpopo alone, we have built no less than three hundred thousand houses, benefitting about 1.4 million households.

The provision of water is an integral part of our strategy to ensure economic development and poverty eradication. Although we have provided no less than 86% of our people with access to basic water, a lot more still needs to be done. We have completed and launched De Hoop Dam in Sekhukhune last year; the dam will provide Sekhukhune district, Polokwane and Mogalakwena municipalities with water. The focus for this year will be to speed up reticulation of water to households so that our people can enjoy clean water.

The fight against crime and corruption remain a top priority of our government. According to the recent South African Institute for Race Relations study which focused on murder, robbery and assault, Limpopo remains the safest province to live in. The war against crime can only be won through effective partnerships between the police, the community and the government. Those who want to report corruption anonymously can make use of the Premier's Hotline and related facilities available at our various departments and municipalities

5.4 WATERBERG DISTRICT MUNICIPALITY - POWERS AND FUNCTIONS

Powers and functions of Waterberg District Municipality conferred to it through section 84 sub-section 1 of the Local Government Municipal Structures Act:

<i>POWERS AND FUNCTIONS</i>	<i>RESPONSIBLE DEPARTMENT</i>
1. Integrated Development Planning for the district municipality as a whole.	Municipal Manager's Office
2. Refuse removal, refuse dumps and solid waste.	Social and Community Services
3. Cemeteries and crematoria.	Social and Community Services
4. Municipal Health Services	Social and Community Services
5. Firefighting services	Social and Community Services
6. Air pollution	Social and Community Services
7. Municipal roads which form an integral part of road transport system for the district area as a whole	Infrastructure and Development
8. Bulk water supply	Infrastructure and Development
9. Bulk supply of electricity	Infrastructure and Development
10. Municipal Abattoir	Planning & Economic Development
11. Promotion of local tourism for the area of the district municipality.	Planning & Economic Development
12. Municipal transport planning	Planning & Economic Development

5.5 MUNICIPAL PRIORITY ISSUES

NO.	PRIORITY
1	Municipal Environmental Health & Environmental Management
2	Disaster Management (fire services included)
3	Local Economic Development & Tourism
4	Municipal Roads & Storm water
5	Municipal Support & Institutional Development
6	Community Participation & Good Governance
7	Land
8	Sports, Arts & Culture
9	Water & Sanitation
10	Electricity
11	Transport
12	Abattoir

5.6 IDP PROCESS PLAN

Waterberg District Municipality adopted a 2014/15 IDP Review Framework and Process Plan. The Process Plan which informed all 6 local municipality's process plans was adopted by the Municipal Council. The main purpose of the Process Plan is to integrate all the processes and activities, institutional arrangements and time frames of the various sector departments, NGOs, Parastatals, etc. The Framework /Process Plan was adopted by Council. The Process Plan will guide the municipality in terms of Legislative requirements and the timeframes thereof.

- To guide decision making in respect of service delivery and public sector investment.
- To inform budgets and Service delivery programs of various government departments and service agencies.
- To coordinate the activities of various service delivery agencies within Waterberg District Municipality

STATS SA 2011

(3) Male and Female

In the Waterberg there is currently a fraction more males than females, because of the presence of job opportunities that attract men from other areas in the country and outside. Thabazimbi taking the lead followed by Lephalale, this is because of impact of the mines in Thabazimbi as well as Medupi Power Station and coal mines in Lephalale.

SEX RATIO (MALES PER 100 FEMALES)

7. KPA 1 - SPATIAL RATIONALE

SPATIAL ANALYSIS

AMENDMENTS TO MUNICIPAL BOUNDARIES - The only amendments to municipal boundaries as proposed by the Demarcation Board is a portion of Mogalakwena to the north of the R518 now forming part of Lephalale.

1.SETTLEMENT PATTERNS AND DEVELOPMENT

MAJOR TOWNS/SETTLEMENTS

TOWN/SETTLEMENT	BRIEF HISTORY
Mokopane	It was established by the Voortrekker leader Hendrik Potgieter in 1852 and named Vredenburg as symbol of reconciliation between himself and the other Voortrekker leader, Andries Pretorius. Due to continuous skirmishes between the early settlers and the local tribes as well as the heavy toll malaria had on the people, the town was evacuated and only re-established in 1890. It was awarded municipal status 1939. The name was changed again in 2002 to Mokopane after the Ndebele chief who moved to the Waterberg area in the nineteenth century.
Mookgopong	Was established in 1886 as a halfway house between Pretoria and Polokwane. It served as a trading post until 1907 when it was proclaimed as a town.
Modimolle	Was established by a group of pioneers known as the Jerusalem Trekkers who believed they have reach the Nile and had been close to the Holy Land. The river flowed north and the koppie (Modimolle) looked like a pyramid. The town was established in 1866.
Bela Bela	Tshwana people settled in the 1860 around the warm water springs. The town was established in 1882 and it got municipal status in 1932.
Thabazimbi	Was established only in 1953 after iron ore discovered was discovered in 1919. The ore deposits were bought for Iscor and the town established for the employees.
Lephalale	It is the youngest town in the WDM area. It was established in 1960 and got municipal status only in 1986.

DISTRIBUTION OF SETTLEMENTS WITHIN THE DISTRICT

Municipality	No of settlement	No. of wards
BELA BELA LM:	7 Farms & Small holding	9
MODIMOLLE LM:	27	9
MOGALAKWENA LM:	178 villages 2 Townships 1 Town	32
MOOKGOPHONG LM:	6	5
LEPHALALE LM:	38 villages 1 Town 2 Township	12
THABAZIMBI LM	1 Town 1 Township	12
Total for District	216 Villages 6 Towns 11 Townships	79

2) SPATIAL CHALLENGES & OPPORTUNITIES

- Illegal occupation of land (Informal Settlements)
- Poor quality of RDP houses.
- Formalisation of informal settlements
- Poor understanding of Spatial Planning issues (Spatial Development Frameworks, Land Use Management System, and Integrated Development Plans).
- Delayed restitution of land.

- Inadequate land for development.
- Poor planning in rural areas due to poor implementation of land use management scheme.
- Illegal subdivision of agricultural land.
- Poor community participation on land use planning.
- Inadequate staff compliment to deal with spatial and land use management.
- Dismantling of racial settlement in municipalities.
- Delays in transfer of land.
- Delay in settling outstanding land claims can create a risk to investors.
- Mushrooming of informal Settlements in towns and townships.

SPATIAL IMPLICATIONS

- Deliberate measures to dismantle racial settlement patterns.
- CBD to incorporate into IDP for implementation.

(3) Hierarchy of Settlement / Growth points Areas

The Spatial Development Framework of the Limpopo Province classifies the towns and villages in First, Second and Third Order Settlements to accommodate development and investment.

Nodes	Provincial	District	Municipal
1st order node Growth Points (focus on growth within Local municipalities but have little influence on district and its other locals).	Mokopane /Lephalale	Modimolle Thabazimbi Bela Bela	Mookgophong/ Tbz -Northam/ Leph –Thabo Mbeki/Witpoort Lepurupurung/ Mogalakwena - Mmotong/Bakenburg
2nd order Nodes Population concentration points (provide services to local and surrounding communities)	Mog – rebone, Mabusela Bela- Pienaarsrivier Modimolle- Mabatlane/Vaalwater Lephalale – Setateng, Ga-Seleka, Abbotspoort		
3rd order nodes local service points (provide services to dispersed surrounding rural population)	Mookg- Radium Bela Bela- Radium, Settlers, Rapotokwane, Vingerkraal, Rust de Winter, Leph – Marnitz, Tom Burke, Tbz – Leeupoort, Koedoeskop, Dwaalboom Mod – Mabaleng Mog – Matlou, Marken		

4. LAND USE COMPOSITION - LAND USE MANAGEMENT SCHEMES AND SDFs (WDM SDF).

MUNICIPALITY	LAND USE SCHEME	IMPLEMENTED	SDF
BELA BELA LM:	Proclaimed land use scheme is in place	Implemented	Available
MODIMOLLE LM:	Proclaimed land use scheme	Implemented	Available
MOGALAKWENA LM:	Proclaimed land use scheme	Implemented	Available
MOOKGOPHONG LM:	Proclaimed land use scheme	Not implemented	Available
LEPHALALE LM:	Proclaimed land use scheme	Not implemented	Available
THABAZIMBI LM	Proclaimed land use scheme	Not implemented	Available
WDM	N/A	N/A	N/A

The settlement patterns in the Waterberg District have been developed based on the following forces:

- Townships.
- Local Service points.
- Towns.
- The rural nature of large parts of the district.

NB> These have created a number of small settlements with no clear hierarchy based on size.

AREAS OF NATIONAL IMPORTANCE

There are three elements of national importance within the Waterberg District.

1. The Medupi Power Station that will supplement existing power generation and is of critical importance to ensure sufficient energy capacity for the entire country over the long term;
2. The Waterberg coal fields located adjacent to Medupi, as identified by the National Development Plan; and
3. A heavy haul corridor from the Lephalale area to the south.

5.Land Claims & Illegal occupation of land: Land claims and land restitution is a very important albeit a contentious issue. However, from a spatial planning point of view land ownership does not necessarily determine the preferred use of land. The exceptions are, as is the case with tribal land, where uses are restructured through restricted ownership practices, and where land restitution leads to commercially productive land becoming unproductive. The land restitution process can restrict investment and economic activity over the short and medium term but should not have an impact on the long term use of the land.

Types of Dwelling
House or brick structure on a separate stand or yard
Traditional dwelling/hut/structure made of traditional materials
Flat in block of flats
Town/cluster/semi-detached house (simplex; duplex; triplex)
House/flat/room in back yard
Informal dwelling/shack in back yard
Informal dwelling/shack NOT in back yard
Room/flatlet not in back yard but on shared property
Caravan or tent
Private ship/boat
Not applicable (collective living quarters)

Waterberg District Municipality Informal Settlements

With established towns and townships within the municipal area, there are sprawling informal settlements that are found adjacent to the nodes, especially where there are mining activities. The existence of the informal settlements within the municipal area extends the service delivery backlogs in municipalities.

7. Environmental Analysis

Environmental Legislative framework.

There are a number of regulation, policies, acts and treaties that are meant at the protection, preservation and conservation of our natural resources. Below is a summary of the legislative framework of the state.

1. The Constitution.

Section 24 of the Constitution of South Africa Act 108 of 1996 provides that everyone has the right to an environment that is not harmful to their health or well-being and to have the environment protected, for the benefit of present and future generations, through reasonable legislative and other measures that:

- Prevent pollution and ecological degradation;
- Promote conservation; and
- Secure ecologically sustainable development and use of natural resources while promoting justifiable economic and social development

2. The National Environmental Management Act.

The National Environmental Management Act, No. 107 of 1998 (NEMA) came into operation on the 1st January 1999. It is the flagship environmental statute of South Africa. NEMA's primary purpose is to provide for co-operative environmental governance by establishing principles for decision-making on all matters affecting the environment. NEMA also establishes procedures and institutions that will promote public participation in environmental management.

Chapter 1 of NEMA stipulates Environmental Management must place people and their needs at the forefront of its concern, and serve the physical, psychological, developmental, cultural and social interest equitably. It also advocates that development must be socially, environmentally and economically sustainable.

The principles enshrined in NEMA guide the interpretation, administration and implementation of the environment in South Africa. These principles serve as a framework within which environmental management must take place. They include amongst others, sustainable development and the 'polluters pay' principle.

2.1 Sustainable Development

Sustainable development is required to ensure the integration of social economic and environmental factors in decision-making so that development serves present and future generations. Furthermore sustainable development requires that a risk-averse and cautious approach be applied to decision-making.

2.2 Polluter Pays Principle.

The 'polluter pays' principle provides that the cost of remedying pollution, environmental degradation and consequent adverse health effects and of preventing, controlling or minimising further pollution, environmental damage or adverse health effects must be paid for by those responsible for harming the environment'. NEMA imposes a duty of care on every person who causes, has caused or may cause significant pollution or degradation of the environment to take reasonable measures to prevent the pollution or degradation of the environment from occurring, continuing or reoccurring.

3. The National Water Act.

The National Water Act, No. 36 of 1998 ('the National Water Act') recognises that water is a natural resource that belongs to all people. The National Water Act regulates the manner in which persons obtain the right to use water and provides for just and equitable utilisation of water resources. Sustainability and equity are identified as central guiding principles in the protection, use and these guiding principles recognise:

- The basic human needs of present and future generations;
- The need to protect water resources;
- The need to share some water resources with other countries; and
- The need to promote social and economic development through the use of water.

4. National Environmental Management: Waste Act.

The National Environmental Management: Waste Act, No. 59 of 2008 ('Waste Act') was enacted to reform the law regulating waste management and to govern waste management activities. The Waste Act has repealed and replaced those sections of the Environmental Conservation Act that dealt with the prevention of littering and waste management. The Act creates a general duty in respect of waste management obliging holders of waste to minimise waste, recycle and dispose of waste in an environmentally sound manner. Holders must also prevent any employees from contravening the Waste Act.

Section 18 introduces 'extended producer responsibility'. The Minister may identify a product, in terms of which extended responsibility applies, identify measures that must be taken and by whom. The Minister may specify how to implement such extended responsibility and any financial arrangements that must be made

5. National Environmental Management: Biodiversity Act.

The National Environmental Management: Biodiversity Act, No 10 of 2004 provides for the management and conservation of South Africa's biodiversity, the protection of threatened and protected species and ecosystems, the sustainable use of indigenous biological resources and the equitable sharing of benefits arising out of bio-prospecting of those resources.

6. National Environmental Management: Air Quality Act.

The Air Quality Act regulates air quality in order to protect the environment. It provides reasonable measures for the prevention of pollution and ecological degradation and for securing ecologically sustainable development while promoting justifiable economic and social development. The Act further provides for national norms and standards regulating air quality monitoring, management and control by all spheres of government. It also provides for specific air quality measures.

1. BIOPHYSICAL ENVIRONMENT

Most of the study area falls within the Central Bushveld Bioregion, which falls within the Savanna Biome. There are also small patches of vegetation that fall within the Mesic Highveld Grassland Bioregion, which falls within the Grassland Biome. Patches of Azonal vegetation is also found within the area. Lowveld Riverine Forest, Springbokvlakte Thornveld, Central Sandy Bushveld, Makhado Sweet Bushveld and Subtropical Salt Pans are the vegetation types of most concern for conservation. There are 43 mammal species of conservation concern that occur in the study area. Thirteen of these species are threatened with extinction and are on the Red List.

Three centres of endemism occur near the eastern boundary of the Waterberg District. A small part of the Wolkberg Centre of Endemism occurs within the EMF study area. Conservation of this unique vegetation is important.

There are a number of protected areas within the Waterberg District, including Marakele National Park, Entabeni Nature Reserve, Dnyala Nature Reserve and recognised by UNESCO. The presence of the Biosphere Reserve in the study area provides an opportunity to promote biodiversity conservation at the same time as advancing eco-tourism in the study area.

The Waterberg District's natural vegetation has experienced degradation in some areas. This includes urbanisation cultivation or mining. Severe over-grazing is problematic. Biodiversity hotspots and conservation priorities in the study area should be preserved before transformation leads to the loss of the entire area.

The ecological sensitivity of the area was determined using a number of factors, including vegetation types, the presence of rivers, streams, drainage lines and wetlands, presence of steep slopes or mountains and the potential presence of various plant and animal species of conservation concern.

This history of the Waterberg District extends as far back as the Stone Age and is diverse. The history was greatly influenced by natural phenomena and features of the area. Some important cultural and historical features of the area include rock paintings and stone tools of San hunters and Khoe Khoe herders, Bambata clay pottery, and also ruins of Langa Ndebele settlements. The Waterberg District has a rich cultural history also, with various tribes that inhabited the area, as well as the colonial settlements. The interaction between the colonial Voortrekkers and local tribes in the area are of importance especially at sites such as the Makapan's Caves.

2. CLIMATE , RAINFALL AND TOPOLOGY

The northern and western regions of the area experience a hot and semi-arid climate. The southern and eastern regions are more humid and slightly cooler. The mean circulation of the atmosphere over southern Africa is anticyclonic throughout the year. Air circulations have implications for the dispersion of air pollution, and

are influenced by a variety of factors. The main source of information for the atmospheric conditions and wind was taken from the Waterberg District Municipality's Air Quality Management Plan. No measurable evidence of global warming or climate change can be deduced from the information, due to significant natural fluctuations.

The rainy season last from November to March. The average rainfall is 600-650mm with the highest measurements occurs in January and December. Temperatures range between the cooler temperatures of the Waterberg and the hotter climate of the Springbok Flats. Large areas of the Waterberg tourist region are covered with Bushveld habitats, also known as the Savanna Biome, consisting of tall grasses and low trees, most of them deciduous, fine-leaved and thorny. The region provides examples of the dense shrub land with large trees and shrubs that include Umbrella Thorn, Marula, Mopane and Baobab.

3. GEOLOGY, LANDSCAPE and SOIL

The simplified geology of the Waterberg District can be classified into five distinct geology types, namely the Transvaal Super Group, Karoo Super Group, Waterberg Group, Bushveld Igneous Complex, and the Archaean Granite/Gneiss and Swazian Complex. The Karoo Super Group contains coal deposits while Bushveld Igneous Complex harbours important sources of platinum and chromium. The Waterberg Group contains no minerals of economic value. The Transvaal Super Group has iron ore deposits. The lithology of the area shows that there are 26 dominant rock types occurring in the Waterberg District. All of which are described.

The landscape of the Waterberg District is a unique feature that distinguishes it from any other place in South Africa. There are four main landscape features in the Waterberg District, namely the Waterberg Plateau, the Transvaal Plateau Basin, the Pietersburg Plain and the Limpopo Depression.

The character of the Waterberg Escarpment is an important feature of the area. It is an asset that should be protected. Similarly the wide open bushveld plains of the Limpopo Peneplain represent a special South African bushveld character. This character is one of the key selling points that the tourism sector employs in their marketing strategy.

Steep slopes have been identified in the EMF as they are inherently sensitive to change. The soil of the area is diverse. Major soil associations have been identified. These include weakly developed soils on mountainous catchments, uplands and rocky areas, dystrophic, red and yellow, freely draining sandy soils, and plinthic upland duplex and paraduplex soils on undulating middleveld, rugged terrain.

The agricultural potential of the area is intimately associated with topographical, pedological (soil) and climate determinants. Rainfall distribution is also an important factor in determining the agricultural potential.

4. CLIMATE CHANGE AND GLOBAL WARMING IMPACT ON SOUTH AFRICA.

Climate change is a change of the general weather conditions of which the most significant is an increase in temperature of the earth's surface. Besides an increase in average temperature, climate change also causes significant changes in rainfall patterns, and an increase in extreme weather events, giving rise to floods and droughts. Climate change is a Global issue however the impacts of changing weather patterns will be felt most likely at local level and municipalities need to ensure that they can adapt to projected changes.

In the light of global environmental change, can we confidently claim to manage the environment as we always did in the past? The challenge for municipalities is not to predict the future, but to approach the future with the right tools and the right information. Rising CO₂ emission has a detrimental effect on socio economic situation within global communities, with the developing and poor countries being the hardest hit. Some of the visible impacts are severe drought and water scarcity, forest degradation and overgrazing.

Critical actions to reduce climate change and greenhouse gas emissions can best be undertaken locally and municipality as a sphere of government have an obligation to manage resources as efficiently as possible in the interest of the citizens. Failure to do so may have far reaching implications. South Africa's vulnerability to climate change has direct influence on the following:-

- Increased water stress – significant decrease in water availability in many areas.
- Agricultural production and food security – failing crop yield in many areas
- Impact of climate change on human health – large proportion of South African population has low resilience to extreme climate events (poverty, high disease burden, inadequate housing infrastructure and location).

Climate change impact will intensify the forces, which for decades have constrained or obstructed progress towards sustainable developments in many parts of our country. It has the potential and can strongly be linked to negative impact on sustainable development. These can effectively lead to the following impact on sustainable development:-

- Curb economic growth and development
- Undermine efforts to combat poverty
- Hamper efforts to attain Millennium Development Goals
- Threatens to erode the entire community in a specific area

Lephalale has been declared a hot spot by the national minister and this observation has far reaching implications for the municipality in terms of greenhouse gas emission which does not portray a good picture. The municipality should compile baseline information on climate change events possibly dating back approximately thirty years ago. These data will provide information and assist with regard to future planning tools to combat escalation of the situation.

Road transport is responsible for 24.1% of total transport emission in the Waterberg district municipality while industrial emission amount to 95.9% and this put Lephalale as the biggest polluter in the district as indicated in the table below. The increased number of vehicular mode of transport in Lephalale as a result of ensuing development has not only impacted on our roads infrastructure but also increased greenhouse gas emission immensely. Mobility provides access to goods, employment, commercial and social services, access to friends, relatives, communities and leisure. It also provides access to raw material, employees, suppliers, customers and consumers.

Lephalale requires more transport relative to its development trajectory than any other municipality in Waterberg District. This is because the economy is spatially 'challenged' besides being on the countryside. The sparsely distributed rural settlements which are not functionally linked and the fragmented nature of current urban development found in Lephalale between Marapong, Onverwacht and town will always enhance the need for transport.

Cities throughout South Africa face mobility challenge of increasing traffic, chronic congestion, air and noise pollution and increased traffic accidents against a background of climate change and the need to reduce our carbon consumption. The challenge for these cities is to alter the balance of priorities from motorised vehicles to more sustainable and active modes. The traditional approach to dealing with increased transport demand has been to provide additional road space by means of new expansive road infrastructure. This approach has not delivered the expected benefits, however, and new approach to tackling current transport problems is required.

Inspired by the principles of sustainability, an alternative, low-carbon approach focuses on the demand side. One new approach, known as A-S-I (from Avoid/Reduce, Shift/Maintain, Improve) seeks to achieve significant greenhouse gas emission reduction, reduced energy consumption and less congestion, with the final objective to create more liveable cities.

The municipality in an endeavour to provide sustainable transport should also be seen as an ultimate goal to which we need to move 'greening' transport along the way, but simultaneously our lack of reliable public transport can allow us to 'leapfrog' to new and better technologies and systems.

Key Climate Change Issues / Risks in Local / District Municipalities in Limpopo

WATERBERG

Issues relating to Climate Change

Waterberg District	1. Mining 2. Deforestation 3. Governance 4. Veld fires
Modimolle	1. Governance 2. Waste management 3. Alien invasive species 4. SDF – no environmental sensitive areas – new developments allowed in wetlands 5. Housing in flood planes or landfill sites
Bela - Bela	1. Governance 2. Waste management 3. Deforestation
Lephalale	1. Air pollution – mining 2. Ground water availability 3. Deforestation 4. Governance
Thabazimbi	1. Mining 2. Waste management 3. Governance
Mookgopong	1. Waste management 2. Governance 3. Deforestation 4. Alien species invasion
Mogalakwena	1. Mining 2. Alien Invasion 3. Deforestation

5. WATER RESOURCES AND MOUNTAINS

Waterberg District derives its name from the Waterberg Mountains and was given by the indigenous people of the area because of the many water streams flowing down the mountain slopes. The Waterberg Mountain Range forming a central mountain plateau occupies the central part of the District. It is linked to the Sebetiela Mountains in the south-eastern part of the District, which in turn is link to the Great Escarpment of the Drakensberg Mountain Range by the Strydpoort Mountains. The Rooiberg Mountains are located in the south-western part of the District. The rivers flowing in the District drain in a north-westerly direction to the Limpopo River that has a direct influence on South Africa's neighbouring countriesThe following rivers are the most prominent in the District:

- Mokolo;
- Limpopo;
- Lephalale;
- Mogalakwena;

- Sterk;
- Olifants and
- Nyl

Rivers are, and will always be areas where people congregate and have the highest impact. These impacts take place over a considerable period of time. Rivers are described as environmental arteries and when damaged, dramatic environmental catastrophes result, having a ripple effect on other environments. Waters from these rivers are mainly used for irrigation and human consumption. The main catchment areas in Waterberg are Mokolo, Lephalale and Mogalakwena.

6. AIR QUALITY

Air quality legislation comprises primary standards which protect human health and secondary standards which protect property, vegetation, climate and aesthetic values. The development of new industries that increase air pollution through the emission of gases in the atmosphere should be managed. The construction of the new power station in Lephalale requires that the industries should comply with air quality standards. In Waterberg, the air quality hot spots are Lephalale, Mogalakwena and Thabazimbi.

The Waterberg District Municipality Air Quality Management Plan, completed in June 2009 was used as the main source of information. The Air Quality Management Plan compiled an emissions inventory for the Waterberg District. This was compiled for air pollution sources where information was available or where emission factors could be applied to quantify emissions. Pollution sources include power generation; mining, industrial emissions, domestic fuel burning, vehicle emissions, agricultural activities, biomass burning, waste treatment & disposal, and dust from various sources.

Currently, the air quality of the Waterberg District is fair, but with future development set to happen in the area, it is expected that air pollution will increase.

Air pollution: Within the municipal area the challenges that are found include air quality, solid and hazardous wastes, the endangerment of biological diversity and degradation of the land caused by overgrazing and deforestation. The impact of the latter mostly affects the ozone and a consequence is global warming

Water pollution:Blue Drop Score per Municipality (Water Services Authority)

	2010	2010/ 11
Bela Bela	61.4%	71.01 %
Modimolle	39.9%	81.70 %
Mogalakwena	26.0%	77.86 %
Mookgophong	44.9%	24.79 %
Lephalale	34.4%	82.63 %
Thabazimbi	54.3	14.32 %

WDM Air Quality Management Plan

Air Quality in WDM

Municipality	Industrial emission	Domestic fuel during	Vehicle omissions	PM10	S02	No2
Lephalale	95.9%	19.1%	24.1%	86.2%	95.4%	94.3%
Bela - Bela	0.0%	4.8%	17.0%	0.4%	0.02%	1.0%
Mookgophong	0.0%	3.5%	6.1%	0.2%	0.01%	0.3%
Thabazimbi	3.6%	10.9%	28.1%	0.8%	4.5%	1.6%
Mogalakwena	0.4%	52.0%	13.2%	11.7%	0.05%	2.2%
Modimolle	0.0%	9.6%	11.4%	0.6%	1.8%	0.6%

WDM Air Quality Management Plan

Within the municipal area the challenges that are found include air quality, solid and hazardous wastes, the endangerment of biological diversity and degradation of the land caused by overgrazing and deforestation. The impact of the latter mostly affects the ozone and a consequence is global warming.

Air quality Management tools

Emissions inventory Database

The data base has been developed and completed during 2012/13 financial year for effective air quality management and control, an accurate, electronic emissions inventory of point, non-point and mobile sources needs to be established. Comprehensive emissions inventory include information on sources parameters (source location, stack height, stack diameter, exist gas velocity, exit temperature) and associated pollutant emission rates. An emission inventory serves the following functions:

- Providing spatially resolved source strength data on each pollutant for dispersion modelling.
- Predict environmental impacts
- Helping in urban and regional planning
- Supporting the design of monitoring network
- Contributing a basis for evaluating trends
- Assisting in the formulation of air quality management policies

Challenges

- The developed data base is not electronic and comprehensive
- Electronic data base is of vital as the information on sources changes regularly, so if data base is
- Hard copy it is difficult to update it when the source changes

Dispersion Modelling Software

Atmospheric dispersion modelling forms an integral component of air quality management and planning. Air Quality models are used to establish a relationship between emissions and air quality. Dispersion models require the input of data which include:

- Meteorological conditions such as wind speed and direction, the amount of atmospheric turbulence, ambient air temperature and the height to the bottom of any inversion layers in the upper atmosphere.
- Emission parameters such as source location and height stack diameter, exit gas temperature and velocity.
- Terrain elevations at the source and surrounding regions.
- Location, height and width of any obstruction (for each source e.g. buildings)

Dispersion modelling is typically used to determine compliance with ambient air quality guidelines or standards.

Challenge

- Waterberg District Municipality does not possess a tool

Ambient Air Quality Monitoring

An ambient air quality management system consists of various hardware, software, communication systems as well as activities related to on-going maintenance and calibration of the system. Continuous ambient air quality monitoring requires among other thing : a set of trace gas analysers housed in the a secure shelter, meteorological equipment, data communication and acquisition system, as well as various other mechanical, civil and electrical structures such as inlet manifold, fencing, concrete plinth, air conditioner, uninterrupted power supply and safety devices such as a lighting conductor.

TRANSITION TO LOW CARBON – ECONOMY

NDP stresses the transition of low carbon economy as one of the major issues that needs to be budgeted for carbon reduction and programmes to be in place. It is also targeting on decline for greenhouse gas emissions, and that by 2030 economy-wide carbon price should be entrenched (zero emission building standards). Installation of solar water heaters is also a recommendation.

7. WASTE MANAGEMENT

The municipality developed the Integrated Waste management Plan as required by legislation and the determined by its powers and functions. The municipality is allocated the function of solid waste disposal sites. The function involve determination of waste disposal strategy, regulation of waste disposal and the establishment, operation, and control of waste disposal sites, bulk waste transfer facility and waste disposal facilities.

In implementing its function the municipality has a role to ensure that waste management systems are in place in all its local municipalities. General waste collection in the District Municipality is domestic, commercial, industrial and institutional. Currently most of the waste is collected from households, followed by commercial industries. There is no district solid waste in Waterberg. Most of the landfill sites are also unlicensed.

8. AGRICULTURE & FORESTRY

Waterberg District contributes almost 30% of the Limpopo Province agricultural activity, agriculture contributes over 4% of the District GGP and it employs around 21% of the labour force of the District. Although named the Waterberg the district is actually classified as a semi-arid area with poor water resources. For crop farmers there have been dramatic changes in many commodity prices leading to changes in cropping patterns. Crops such as cotton, tobacco, maize and sorghum have been badly affected by low international prices and over production and plantings have been reduced significantly, often with negative financial and employment implications. Alternative crops like sunflower, wheat, soya beans, groundnuts and paprika are all internationally traded commodities and thus sensitive to the rand/dollar exchange rate.

The cattle and game industry is undergoing significant transformation. Lead by water constraints, areas previously under dry land and irrigation are being consolidated and converted for extensive livestock production. Similarly other former cultivated land and livestock grazing is being converted to game ranching and eco-tourism. Even within the game ranching industry owners are diversifying into lodges and eco-tourism. This general trend has been encouraged by the establishment and development of the Waterberg Biosphere. This trend is expected to continue.

9. HERITAGE SITES / NATURAL WATER BODIES & WETLANDS

The Waterberg District host internationally renowned tourist attractions that can be used as draw cards to attract more tourists in the area:

Waterberg Biosphere Reserve- received its international status in March 2001 and now forms part of the World Network of biosphere reserves, registered with UNESCO. The Waterberg Biosphere Reserve is the first “savannah” biosphere reserve registered in Southern Africa;

- **The Makapan Valley World Heritage Site** - is a site for one of the most dramatic incidents in the long and fascinating local history near Mokopane town in the Mogalakwena Local municipality. This cooking pot reached a boiling point between the Voortrekkers and the local Ndebeles. The Voortrekkers, which by the 1850s were already well established as far as Schoemansdal near Soutpansberg, used the local area as a thoroughfare. The Makapan Valley was declared as one of the first National Heritage Sites of the new united nation-an act supported by all local communities. In fact, current Chief Mokopane made contributions towards the development of the site as a cultural shrine and tourism icon. The application for the World Heritage Status has been approved by UNESCO.
- **Nylsvley Wetland**- is a registered Ramsar site (Ramsar is the international convention for the protection of wetlands). More than 400 bird species have been recorded on the 16 000ha wetland extending some 70 kilometers between the towns of Modimolle and Mokopane. The heart of the Nylsvley wetland is in the Nylsvley Nature Reserve with five modern bird hides providing perfect view and photo opportunities.
- **Marakele National Park** – located in the northeast of Thabazimbi, this park is undoubtedly one of the greatest wilderness areas of South Africa, the park has become a ‘place of sanctuary’ for an impressive variety of wildlife due to its location in the transitional zone between the dry western and moister eastern regions of South Africa.
- **Hot Spring Water**- the strong mineral springs with a flow of 220 000 litres of water per hour with a temperature of 52 degrees Celsius gave rise to the establishment of Bela-Bela (Warmbaths). The town’s progress was to a large extent due to the hot water and their healing qualities. The water from the

springs is rich with sodium chloride, calcium carbonate and other salts are, amongst others, beneficial to persons suffering from rheumatic ailments. About 400 000 people visit the beautiful swimming baths of the springs annually, mainly during winter months when the climate is pleasant.

10. DISASTER MANAGEMENT

Disaster: means a progressive or sudden, widespread or localized, natural or human caused occurrence causing catastrophic situation whereby the day-to-day patterns of life are, or are threatened to be, disrupted and people are, or are threatened to be, plunged into helplessness and suffering.

FLOODING ACROSS THE WATERBERG DISTRICT 14/15FY.

- Affected Areas
- Lephalale LM is worse affected by the this floods as a result of overflowing Mogol and Phalala Rivers and the following are their vulnerable communities:-
- Thabo-Mbeki Township 177 victims, Mamojela Park informal settlement ±3000 people are being evacuated, Mogol farming communities along D171 route and Beska bridge, Mokuruanyane, Kauletsi, Martinique, Abbotspoort, Shongoane 1-3 and Ga-Seleka;
- Thabazimbi LM is affected at Jabulani informal settlement due to the mining dam burst;
- Koedoeskop Bridge water level is increasing threatening to flood Thabazimbi soon (as at Friday, 14 march 2014);
- Crocodile river is constantly rising threatening overflow, however our officials are measuring the river every 4-5 hours for alerts;
- Modimolle-Mabaleng Alma Sand river overflowing is stable as reported but being monitored constantly even though the victims have not received relief food so far and Vaalwater-Leseding Ext1-4 including their informal settlements 704 houses households were affected and stable for now being monitored as reported by their emergency team leader;
- Bela-Bela was worse affected by Klein Kariba & Thaba Monate Dam busrts on 07 & 14 March 2014 as it flooded R101 (with lots of potholes) route until in town where the Railway station, Industrial area and some businesses were under the severe water
- 3 victims were evacuated to the community hall at Spa Park and currently the threatening situation was reported for rising overflowing by Pienaarivier and settlements residing on the flood line were concertized regarding possible evacuation to the community hall on 12 March 2014;
- Mookgopong eastern settlements (formal & informal) currently stable as reported by their emergency team leader;
- Mogalakwena preliminary report dated 10 March 2014 indicates that ±20 houses at Mahwelereng Ext. 20 were affected by flooding and school children were then assisted by our Mogalakwena rescue team to crossover stream water, Sterkwater victims were evacuated to the community hall;
- Limpopo River-Derdepoort, Platjan and Zanzibar Port of Entries overflowing or not fully operational, except Stockpoort and Groblersbrug Port of Entries that are operational.

NB: BUDGET CONSTRAINTS IS STILL A PROBLEM TO ADDRESS THE DISASTER DAMAGES.

The following are identified:

- Refugees, epidemics, explosions, extreme weather , hazardous material, aircraft crashes, fire, transport, power and nuclear waste
- Disaster Management arrangements are designed to:

Disaster management: A collective term encompassing all aspects of planning for and responding to disasters, including both pre and post-disaster activities namely, prevention, mitigation, preparedness, response, recovery and rehabilitation. It may refer to the management of both the risks and consequences of disasters. It means a continuous and integrated multi-sectoral, multidisciplinary process of planning, and implementation of measures.

HAZARDS.

While most attention is given to the obvious emergencies such as fire and transport accidents, a wide range of hazards could be dealt with using disaster management arrangements and resources. This might include emergencies for which there is little or no experience in the Limpopo Province, such as earthquakes or environmental emergencies.

HOW TO DEAL WITH DISASTER

- Be integrated. (Involve all people and relevant agencies). viz;
- Private sector organizations
- Individual members of the community
- Government departments and Voluntary Organizations are also playing a major role in disaster management.
- Be comprehensive. (Cover prevention, response and recovery). Prevention response and recovery are all important aspects of disaster management, and each should be explicitly addressed in the arrangements.

MUNICIPAL HEALTH

The functions:

- Water quality monitoring
- Food control
- Waste management
- Health surveillance and prevention of communicable diseases, excluding immunization
- Vector control
- Environmental Pollution control
- Disposal of the dead

ENVIRONMENTAL CHALLENGES IN WATERBERG DISTRICT

ISSUES	DETAILS
Sanitation	• Mogalakwena ,Lephalale and Thabazimbi have inadequate sanitation systems • Modimolle and Bela- Bela experience a lot of overflowing sewage due to aged infrastructure
Harvesting of firewood	• Mogalakwena and Modimolle experiences high usage of firewood for cooking and heating

Water quality	- Most of the rural communities rely on borehole s / bulk storage for water provision. - Mining and industrial activities might affect the underground water quality especially in Lephalale and Mogalakwena. - The aged /old infrastructure has a negative impact on the quality of water especially the chemical content. This usually happens in Bela- Bela and Modimolle
Air Quality Management	- Lephalale local municipality is the major source of industrial emissions, contributing to approximately 96% of emissions in the District. Matimba Power station and Grooteegeluk Coal Mine are the main contributing sources in this Municipality. - Thabazimbi and Lephalale are the main contributors to vehicle emissions, contributing 28% and 24% respectively.. - Mogalakwena is the largest contributor to domestic fuel burning emissions in the District, contributing to approximately 52% of emissions.

8. KPA 2 - BASIC SERVICE AND DELIVERY

HOUSEHOLD SERVICES

STATS SA 2011

8.1 WATER AND SANITATION

1. WATER

THERE ARE TWO PROGRAMMES IN PLACE IN ORDER TO ENSURE EFFEDCTIVE AND EFFICIENT DELIVERY OF SUSTAINABLE WATER SERVICES.

- Blue Drop Certification Programme** for Drinking Water Quality Management Regulation (measures and compares the results of the performance of Water Service Authorities and their Providers) ;
The province has eleven (11) WSAs together with the Water Services Providers assisting some of the WSAs. The Department has audited 74 water supply systems during 2014 Blue Drop audit cycle. There was substantial decline in 2014 provincial Blue Drop score with a decrease of 17.9% resulting in a decline from 9 to 1 in the number water supply systems achieving Blue Drop Certification status. Forty five systems received BD scores below 50% while 18% of the systems are in high category risk while 2 systems are in critical risk category.

Provincial performance trends:

Blue Drop trends 2009 to 2014					
Water Services Authority	2009	2010	2011	2012	2014
Polokwane Local Municipality	65%	81%	93%	87%	92%
Lephalale Local Municipality	15%	34%	83%	93%	85%
Capricorn District Municipality	45%	56%	87%	72%	71%
Modimolle Local Municipality	19%	40%	82%	70%	63%
Mopani District Municipality	N/A	75%	64%	79%	62%
Mogalakwena Local Municipality	N/A	47%	78%	61%	60%
Thabazimbi Local Municipality	N/A	54%	14%	54%	56%
Greater Sekhukhune District Municipality	N/A	50%	59%	60%	48%
Bela-Bela Local Municipality	64%	61%	71%	71%	43%
Vhembe District Municipality	N/A	42%	45%	75%	39%
Mookgopong Local Municipality	N/A	45%	25%	32%	26%

Lephalale Local municipality achieved second provincial spot together with Exxaro and Eskom which are WSPs for the municipality with a score of 85%.

The Department has notice slight improvement in Thabazimbi local municipality from 54% to 56%. Though this improvement may not be significant but it's a step in the right direction towards improved service delivery. The decline of Blue Drop performance compared to 2012 BD audit was also noticed in Bela-Bela LM ,Vhembe District Municipality and Mookgopong municipality.

Provincial performance

In contrast to the Blue Drop scores, the 2014 Blue Drop Risk Ratings for the province generally showed an improvement with the average risk rating decreasing from 52% to 23%. This improvement could be attributed to reduction of risk rating in Process controlling and risk management within the Province. The average municipal risk rating varied widely from the Polokwane local municipality with a low risk rating of 24% to the Mookgopong local municipality with a concerning risk rating of 84%. This shows that the drinking water quality is not in compliant with the SANS 241 drinking water quality standard and could pose health risks to the public.

2. **The Green Drop Certification Programme** for Wastewater Quality Management Regulation (focuses on the entire business of the municipal wastewater services (entire value chain), the risk analysis focuses on the wastewater treatment function specifically).

The 2014 Green Drop Progress report is based on a self-assessment by the municipalities and confirmed by the Department of Water and Sanitation to ensure credibility and verified information is reported to the public. The DWS team that served as moderators for the information provided by the Water Services

Institutions is made up of a trained group who not only assesses the performance, but they also ensure that regulatory advice is given to municipal wastewater management on required improvements.

The main objective of this regulation approach is to identify measure and develop the core competencies required for the sector that, if strengthened, will gradually and sustainably improve the level of wastewater management in South Africa. A wastewater treatment works with a higher Cumulative Risk Rating (CRR) value means that plant has reached or is approaching its critical state of operation and therefore requires intervention. A lower CRR value means the plant holds a low and manageable risk position.

The 2014 Green Drop Progress Report presents the current risk profile and a 6-year trend analysis of wastewater treatment plants on three levels:

- National overview that collate and elevate the detailed findings on system level to that of a provincial overview, which can then be compared and inculcated as a national view of wastewater treatment performance. Comparative analyses amongst the provincial performances are useful indicators and benchmarks for the various role players.
- Province specific risk figures and information to highlight the strengths, weaknesses and progress for the collective of WSI's within the province or region;
- System specific risk data and information pertaining to the performance of each wastewater treatment system per WSI (municipal, private WSI's);

CUMULATIVE RISK COMPARATIVE ANALYSIS							
Highest CRR	25	29	32	28	30	29	↓
Average CRR	13.5	13.3	13.6	12.3	12.2	13.4	↑
Lowest CRR	5	4	3	2	4	3	↓
Average Design Rating (A)	2.5	1.4	1.4	1.4	1.4	1.4	→
Average Capacity Exceedance Rating (B)	3.3	3.7	4.1	3.8	3.6	4.1	↑
Average Effluent Failure Rating (C)	3.2	5.7	5.7	4.7	4.9	5.1	↑
Average Technical Skills Rating (D)	1.7	2.4	2.6	2.5	2.5	2.9	↑
AVERAGE % DEVIATION FROM maximum-CRR	67	66.8	69.2	66	65.4	71.7	↑

The above data indicate that the overall risk profile of wastewater treatment plants remained reasonably constant over the period 2008 to 2013. However, digress in the performance of municipal treatment facilities is evident for 2014, based on the unvarying upwards risk trend arrows. The highest risk plant and position of 30 (2013) has reduced to a CRR value of 29 but still giving an increased national average of 13.4 as opposed to 12.2 in 2013. The cumulative effect can be seen in the increased and digressed CRR/CRRmax % deviation from of 65.4% (in 2013) to 71.7% (in 2014). A positive reflection is to be found in the reduction of both the maximum CRR (30 to 29) and minimum CRR (4 to 3) of all plants.

The movement of risk in the following barchart shows that the majority of plants are in high risk (259) positions, followed by 218 plants in medium risk and 212 plants in critical risk positions. The reduction in the number of plants in low risk domain, which decreased from 199 to 135, is raising concern. Some of the formerly 'low risk' plants have since moved into higher risk positions, which is undesirable. This can be seen by the increase in high risk plants from 232 to 259, and critical risk plants from 121 plants to 212 plants. The 2014CRR/CRRmax % deviation is made up by the risk profiles of the various provinces as follows (comparative figure for 2013 provided below the 2014 results):

PROVINCIAL PERFORMANCE 2014

The following municipalities are in high and critical risk positions in Limpopo following the assessments. Subsequently, these plants are placed under regulatory surveillance and therefore require immediate intervention:

WSA Name	2014 Average CRR/CRRmax % deviation	WWTPs in critical and high risk space	
Greater Sekhukhune DM	90.3%	Burgersfort, Elandsdraal, Groblersdal, Jane Furse, Leeuwfontein (Mokganyaka), Meckleberg (Moroke), Monsterlus (Hlogotlou), Motetema, Nebo, Phokwane, Tubatse	Denilton, Marble Hall, Roosenekaal
Mogalakwena LM	86.4%	Rebone	Mokopane old & new
Lephalale LM	83.5%	Zongesien	
Mookgophong LM	82.4%	Thusang (Roedtan)	
Thabazimbi LM	80.4%	Thabazimbi	Northam, Rooiberg
Mopani DM	79.5%	Modjadji (Duiwelskloof), Senwamokgope, Namakgale	Lulekani, Giyani, Pahlaborwa, Lenyenye
Vhembe DM	78.8%	Mutale, Mhinga, Musina, Nancefield, Thifulanani	Thohoyandou, Dzanani, Siloam Ponds
BelaBela LM	78.4%	Radium	Pienaarsrivier
Modimolle LM	73.5%		Vaalwater
Capricorn DM	69.4%		Alldays, Lebowakgomo Ponds, Senwabarwana

	Medium risk WSA and plants
	High risk WSA and plants
	Critical risk WSA and plants

Green Drop Progress Acknowledgement 2014

The following municipalities are commended for their outstanding achievement in terms of risk abatement and overall risk management practices. Well done and continue to aspire to advance this good practice to even higher peripheries in the coming year of full Green Drop Certification Audits.

Limpopo:

- ◆ **Best overall risk positions achieved:** Polokwane
- ◆ **Best progress in risk abatement:** Vhembe

CLIMATE CHANGE WATER QUALITY-RELATED IMPACTS

- Less irrigation and drinking water could be available due to increasing water temperatures linked to higher ambient temperatures.
- Favourable conditions for the incubation and transmission of water-borne diseases may be created by increasing air and water temperatures.
- Increased fish mortality due to reduced oxygen concentrations in aquatic environments and mortality of temperature-sensitive fish species.
- Human health and ecosystem impacts, associated with increased rainfall intensities, flash floods and regional flooding including overflowing sewers due to sewage pipes blocked with washed-off debris, damage to sewerage infrastructure resulting in raw sewage discharges into rivers, scouring and erosion of urban streams, increased sediment and pollutant overflow and damage to low lying water and wastewater treatment works disrupting drinking water supplies.
- Increased periods of drought mean less water is available to dilute wastewater discharges and irrigation return flows resulting in reduced water quality and associated downstream health risks to aquatic ecosystems.

WATER CHALLENGES

- Inadequate bulk water supply
- Ageing infrastructure
- Poor quality of drinking water
- Inadequate bulk water supply
- Inadequate funding
- Illegal connections, theft and vandalism

IMPLICATIONS

- Loss of revenue
- Inability to reach/achieve MDG targets
- Impedes on possible investors in the District

Recommendations

- Upgrading of water supply
- Funding outsourced from DWA for projects to upgrade water supply.

SANITATION CHALLENGES

- Ageing infrastructure
- Inadequate bulk water supply
- Inadequate funding

IMPLICATIONS

- Loss of revenue
- Inability to reach/achieve MDG targets
- Impedes on possible investors in the District

Recommendations

- Upgrading of water supply
- Funding outsourced from DWA for projects to upgrade water supply.

(3) Challenges pertaining to provision of electricity

- Funding
- Poor infrastructure

8.2 Roads and Storm Water

8.3 Municipal roads and storm water infrastructure

(2) State of municipal roads

Roads in the WDM are adequately connected with National, Provincial, and District Roads. The primary route network includes the N1, N11, R518, R572, R33, R510, R516, and the R101. However, there is no direct route connecting the Limpopo Province and the North West Province. There is concern on the rapidly

degrading of many roads due to the increasing economic activities in the District (increase in heavy vehicles with mining materials), and a lack of maintenance and rehabilitation.

In addition to the above roads, the local access roads are gravel and predominantly utilised by buses and taxis. The condition of these roads is below standard. They require upgrading, improved storm water management, lighting, parking, and other road furniture. There are also internal village streets and these are generally in a bad state. Once the major roads have undergone general upgrading, attention can be given to the upgrading the minor roads.

The WDM provides a budget in the IDP for roads but it is not based on a road prioritisation plan and management system .There is no pavement management data, traffic data, etc. to prioritise the upgrading of roads. However, the Road Agency Limpopo, South African National Roads Agency Limited, Limpopo in Motion, Limpopo 2020 Infrastructure Study, Public Transport Plan, and correspondence with the Transport Forum realised a list of roads that should be prioritised.

WDM has a total road distance of 21 938km of which only 16% or 3 555km are surfaced. However, most of the roads in the proclaimed towns are surfaced but are not necessarily in a good condition. Unpaved roads in rural towns and most of the district roads are in a relatively good condition. One should note the fact that there are a number of road building and surfacing projects in progress. This will improve accessibility and mobility of people in general.

WDM Road Length & Surface

8.4 Waste Management

The municipality developed the Integrated Waste management Plan which allocated the function of solid waste disposal sites. The function involve: determination of waste disposal strategy, regulation of waste disposal and the establishment, operation, and control of waste disposal sites, bulk waste transfer facility and waste disposal facilities. In implementing its function the municipality has a role to ensure that waste management systems are in place in all its local municipalities. General waste collection in the District Municipality is domestic, commercial, industrial and institutional. Currently most of the waste is collected from households, followed by commercial industries.

State of refuse removal in Urban and Rural settlements.

According to Stats SA 2011, only 39% of the households in the Waterberg District Municipality have access to acceptable refuse removal service levels. Modimolle has the highest percentage of households with access to refuse removal services (73.3). It is followed by Bela Bela ,69.7 and Mookgophong 64.1%. Thabazimbi 60.4% and Lephalale 41.0%. Mogalakwena has the lowest percentage of households with access to refuse removal services at 26.8%.

Waste Collection Methodology

Bela- Bela

Settlements that receive municipal waste collection are Bela- Bela and Pienaarsrivier. Generally the municipality provides waste management fairly in their jurisdiction.

Modimolle

The Municipality has two land fill sites in Mabatlane and Modimolle/Phagameng. The Modimolle/Phagameng landfill site has 320 000m³ and the total general waste collected is 840 000 m³ per year. Currently there is a need to relocate the Modimolle Town Land fill site as there is a township development process undertaken in extension 10. The refuse dumps existing in the municipal area have reached their life span capacity. This brings a challenge as there is no land to construct a new land fill site in the municipality.

Mogalakwena

General waste collection in the municipality is found from domestic or households. Settlements that receive municipal waste collection are Mokopane, Mahwelereng and Rebone. The municipality like all municipalities in the Waterberg District Municipality does not provide the service in rural areas. In mining areas, the latter provide the service.

Mookgophong

Settlements that receive regular waste collection services in the Mookgophong Municipality are in the urban areas of Naboomspruit, Mookgophong, Roedtan and Thusang. Other areas in the municipal jurisdiction utilize the informal dumping sites, communal dumb, own refuse dumb and have no refuse disposal means.

Generally there is waste collection in all municipalities as indicated in the Waste management Plan of the District municipality. There is a need of improving the rate of collecting waste as the settlements in the municipalities are growing. It is important that the District municipality including the local municipalities improve the waste management as collection of waste management does not only improve the environment of the community. It also forms as a base for employment creation and revenue generation for the municipalities.

Thabazimbi

Settlements that receive municipal waste collection services are Thabazimbi, Regorogile, Rooiberg, Northam and Leeupoort. Other settlements in the municipality in the remote rural areas do receive the service. In mining areas, the mines collect the waste for the settlements near their jurisdiction.

Lephalale

Generally waste collected is domestic or household waste mostly in urban areas especially in town. Like other municipalities the provision of the service in rural areas is limited. Communities depend on backyard dumping sites and communal sites.

Mookgophong	1	1
Thabazimbi	4	3
Grand total	15	12

(2) Challenges with regard to refuse disposal and any other relevant information regarding waste management

In general, the residents, businesses and institutions are main producers of municipal solid waste. Some of the waste is hazardous and require special handling to protect humans and the environment. These hazardous wastes include pesticides, petrochemicals, medical wastes and heavy metals. Unfortunately most of landfills are unlicensed, and are located within the leaching distances of both human beings and plants nor are they recycled. The municipalities are not strong in controlling both solid and hazardous wastes.

- Limited number of disposal sites to cover the all communities in municipal areas.
- The geographic area is large and it comprised of mostly rural areas, with scattered villages with low population densities and poor quality roads.
- Increased residential development in urban areas often without concurrent increase in resources.
- Illegal dumping areas both in urban and rural settlements.
- Most dumping sites have reached their capacity levels.
- Limited financial resources to establish new dumping sites.
- Refuse removal service is not up to the required standards.

8.5 Public Transport

Modes of Transport

Car ownership within the District area is low and commuters depend on public transport. Further, the mobility of communities is a serious concern. The majority of the population within the WDM walks and mostly use public transport services (bus and taxi operations). According to previous surveys, Taxis emerged as the most utilised public transport service in the district.

Taxi facilities

Within Waterberg District Municipality, there are several factors determining the nature, the distance, and utilisation of routes and operational methods of the taxi industry. Among other factors is the location of towns and villages, dominant economic activities in the area and employment status within Waterberg District Municipality. As a result of these factors, operation of the taxi industry in certain areas and the type of service provided are irregular – i.e. use is sometimes made of certain routes as a result of demand and the pavement conditions of the road. In mining areas such as Northam and Thabazimbi for example, certain routes particularly the long distance routes are provided on certain Fridays, month-end and long-weekends.

On the basis of the survey conducted, 140 taxi routes were identified in the Waterberg District Municipality. The table below provides the number of routes per Local Municipality and its surface conditions.

Taxi Routes in WDM

Local Municipality	Total Number of Routes
Bela-Bela	13
Modimolle	8
Mookgopong	2
Mogalakwena	64
Lephalale	12
Thabazimbi	41
TOTAL	140

Bus operations

Bus companies and sole proprietors who operate small fleets were contacted. Although some operators have operating permits, their services are by and large unscheduled. A combination of questionnaire and request for information was used to capture the bus information. Operators who could provide the following information were requested to do so:

- List of routes;
- Timetables;
- Vehicle registration numbers;
- Passenger statistics; and
- Tariff information.

Questionnaires for individual operators, similar to the ones discussed above, were used for other operators. This was for operations that were in the main unscheduled. The road conditions are generally very poor, especially in the rural areas. Most villages in the Mogalakwena and Lephalale Local Municipalities are not accessible during wet weather. Such road conditions are a significant factor on the operating life of the rolling stock, operating costs, and level of service to the passenger.

Bus Terminals in WDM

Local Municipality	Total Number of Bus Terminals	Total Number of Formal Bus Terminals	Total Number of Informal Bus Terminals
Bela-Bela	1	0	1
Modimolle	1	0	1
Mookgopong	0	0	0
Mogalakwena	4	1	3
Lephalale	3	2	1
Thabazimbi	0	0	0
Total	9	3	6

Waterberg District Municipality's CPTR

Rail operations

At present no commuter rail transport services are in operation in the Waterberg District Municipality. The whole rail network in the Province is owned by Transnet Freight Rail formerly known as Spoornet, serving only long distance passengers. The infrastructure is in relatively good condition and the rail stations in Mogalakwena, Modimolle, Bela-Bela and Pienaarsrivier are the main stations serving mainline passengers. The following lines cover the district:

- Modimolle - Mabatlane line. The line from Modimolle to Mabatlane covers a distance of 74 kilometres. This railway line had been traditionally used for the transportation of agricultural produce. Utilising the line for tourism should be considered more especially that there has been some interest expressed in the past to operate a steam train;
- Mookgopong - Zebediela line. The line from Mookgopong to Zebediela covers a distance of 84 kilometres and was used in the transportation of agricultural produce and citrus fruit such as oranges. In addition, passengers were often transported over weekends by special trains from Johannesburg;

- Northam - Thabazimbi and Lephalale line;
- Northam to Thabazimbi is a distance of more or less 46 kilometres. There are mining shafts near the following halts and stations:
 - Northam;
 - Tussenin;
 - Chromedale; and
 - Thabazimbi.

Light delivery vehicles

LDVs are generally used as public transport in all areas of Waterberg District Municipality, especially in remote rural areas and farming areas, such as GaSeleka and Steilloop. LDVs may be used as means of transport for scholars, but they have been rejected in some municipalities within the Waterberg District Municipality, particularly in Mogalakwena. The concern has been that, in terms of an accident, it looks very ugly. The option was to subsidise scholars who use either taxis or buses. However, LDVs may be used for conveying agricultural produce, not people.

Non-monitored transport

In some areas NMTs are used as an alternative mode of transport, especially in areas such as Mokopane, Steilloop, Modimolle, Bakenberg, Moshate and Tshamahanse etc. It should be noted that in some parts of the Waterberg District Municipality the NMTs have been formalised as a recognised mode of transport which is in line with intermodalism. It emerged during the consultation workshops that these modes of transport play a significant role in conveying goods and people and that it should be fully incorporated into the transport system of the district. However, there is a need for policy and strategy to promote the use of these modes.

Metered taxi operations

Metered taxi operations have been identified as one of the significant operations in some municipalities such as Mogalakwena, particularly because of their complementary role they could play in providing transport during awkward hours. Trains from Gauteng and the surroundings drop people very early in the morning and late in the evenings. As a result, other unofficial transport providers take advantage and rob poor passengers who are stranded at that time. They either pay unreasonable amounts or they do not reach their destinations. Other Municipalities reject such operations, particularly in Thabazimbi. More information still needs to be gathered on meter taxi operations for inclusion in this report.

TRANSPORTATION OF LEARNERS

At present there is official public transport system for learners available in certain municipalities which include Modimolle, Lephalale, Bela-Bela and Thabazimbi local municipalities. Urban learners rely on foot or by public transport, private transport, private school buses or privately arranged special transport to go to school.

What came out consistently in relation to leaner transport is that:

- transport for learners should be affordable and subsidised;
- public transport be made accessible to enable learners reach the educational institution on time;
- non-motorised transport for learners be implemented;
- they rejected LDVs as means of transport for learners; and
- Reduce the distance learners have to walk to and from school provide safe, reliable and affordable transport for learners.

TRANSPORT FOR PEOPLE WITH DISABILITIES

From our observation; the current public transport system in WDM does not seem to be user-friendly for disabled persons. The general lack of public transport infrastructure in the area is the main reason for this problem. It may even be stated that there are basically no public transport facilities available for disabled persons in the area.

The following are the specific principles and objectives that have to be achieved as part of the development of a strategy for addressing the needs of persons with disabilities:

- Proper information systems and communication structures (before and during the journey);
- Specialist transport services (e.g. dial-a-ride type services);
- The design of vehicles/rolling stock so as to allow for people with disabilities (special and normal vehicles);
- Special care during the design of public transport facilities, including ablution facilities;
- Ensuring access to public transport facilities and vehicles for the mobility impaired; and
- Creating institutional and financial opportunities.

Transport challenges and any other relevant information regarding public transport

- Poor access roads;
- Recapitalisation of roadworthy taxis;
- Accidents;
- Lack of transport facilities; and
- Conflicts among taxi owners.

9. SOCIAL ANALYSIS/ SERVICES

1. Housing

The right to adequate housing is enshrined in the Constitution (Act 108 of 1996) and it states that everyone has the right to have access to adequate housing and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realization of this right. Housing is the competency of National government. All housing challenges and programmes are governed by the Housing Act 1997 (Act No.107 of 1997). The Housing Act is the supreme housing law in the country, repealing all other housing legislation that come before it. The National Housing Code is developed in line with the housing act.

State of housing in the municipality

Type of Dwelling	Census 2001	CS 2007

Service backlog at education institution-Lephalale Municipality

No of schools	No of classrooms	Water needs %		Sanitation needs	Electricity needs
94	1146	Water available	No water available	Backlog	Backlog
Total no of learners	Total of teachers	40%	60%	43%	24%
26869	1290				

Challenges regarding education and any other relevant information regarding education.

- Poor road conditions and provision of Scholar Transport to ensure access to schooling
- Inadequate or lack of water
- Illiteracy rate in the District
- Some disabled learners are kept at home.
- Movement/established Informal Settlements
- Mismanagement of Funds
- Demarcation of circuit not in line with municipal boundaries.
- Partnership between locals, private sector and FET's on skills development
- Overcrowding in classrooms.
- Increased teenage pregnancy.

3. Health and Social Development

1. HEALTH

Number of Health facilities within the municipality.

	HOSPITALS	CLINICS	MOBILE CLINICS	COMMUNITY HEALTH CENTRES

QUALITY HEALTH CARE FOR ALL

This is one of the targets for the National Development Plan 2030 vision.

- A District based approach will assist in making sure that there is quality health care for all the people in the community.
- There must be improved management, better trained health professionals, better patient information systems and focus on maternal & infant health care.

DOMINANT TRENDS ON HEALTH ISSUES

There is deterioration of population growth due to high level of HIV/AIDS related mortality, which makes population growth rate slowing, birth rate declining and life expectancy increasing.

MORTALITY

SA is affected by 4 epidemics: i.e. HIV/AIDS, Injury (both accidental and non-accident), infectious diseases e.g. TB, diarrhea & pneumonia etc, growing lifestyle diseases e.g diabetes, obesity etc.

STRATEGIC HEALTH SERVICES CHALLENGES

- High rate of teenage pregnancy
- Ineffective HIV/AIDS awareness campaigns
- Ineffective TB awareness campaigns
- Ineffective health inspectors
- Some people in the community are not covered by the km radius to the hospitals and Clinics
- Partners e.g Eskom, PPL mine and Exxaro promising to build clinics +_ 2yrs no progress e.g sekuruwe, Rietfontein, Molekane, Machikiri
- Funds delaying the completion of projects

IMPLICATIONS

- An application of a 5 km radius from each clinic suggests that a number of settlements are not well provided with health facilities.
- Most rural villages are located quite far from the health facilities i.e. beyond the (20) twenty kilometers of reach from hospitals and beyond five kilometers from clinics.
- The need for the provision of either mobile or immovable clinics would need to be determined within these settlements.

2.SOCIAL DEVELOPMENT

FACILITIES FOR OLDER PERSONS RUN BY NGOs BUT FUNDED BY GOVERNMENT		
NAME OF MUNICIPALITY	FACILITY	LOCATION
Waterberg	Rusoord Waterberg Lewensberg Piet Potgieter Monument	Bela-Bela Modimolle Mookgopong Mokopane

FACILITIES FOR DISABILITIES		
Waterberg	Reamogetswe Day Care Centre Zamakuhle Center For The Disabled	Bela-Bela Moshate

CHILD CARE

	Child care & protection services	# of existing ECD Sites	Child protection Organisations	Foster care Grant Beneficiaries	Foster care grant children	Target # of children to be placed in foster care
Bela Bela	2	25	1	423	647	60
Modimolle	1	28	1	396	635	80
Mogalakwena	-	115	2	1 241	1 756	376
Mookgophong	1	20	0	172	254	60

Thabazimbi	1	24	1	258	401	60
Waterberg District	5	261	6	2 997	4 462	800

SOCIAL DEVELOPMENT CHALLENGES

- Lack of submission of death certificates to SASSA for system updates.
- Need to educate the youth about teenage pregnancy, STI's and HIV/AIDS.
- Child support is high and of great concern.

9.4 SAFETY AND SECURITY

The number of police stations in the municipality

1.Availability of Police Stations

Location	Level of service
Bela-Bela(3)	Bela-Bela (Warmbath) Town – Main station Pienaarsriver – Main station Rus de Winter – Main station

Lephalale(6)	Lephalale – Main Station Thabo Mbeki – Main Station Tom Burke – Main Station Villa Nora – Main Station Shongoane – Main Station Belg Rivier – Main Station

Thabazimbi (6)	Thabazimbi – Main station Rooiberg – Main station Cumberland – Main station Hoopdal – Main station Dwaalboom – Main station Northam – Main station
Waterberg Total	25 Police Stations

2.Shortage/Backlogs of safety and security facilities & CHALLENGES

- Not identified by the department

*The DSSL prepared to assist municipalities in safety and security sector planning

SAFETY AND SECURITY CHALLENGES

- Monitoring of proper utilization of licenses and permits issued to liquor sellers.
- Illegal operation of unlicensed sheebens and taverns.
- Access to certain crime scenes due to bad conditions of roads and lights.
- Domestic violence (women and child abuse).
- Crime awareness and substance abuse.
- Urgent municipal by-laws.

3.CRIME CATEGORY STATUS PER CLUSTER

Crime Category	Lephalale Cluster	Belabela Cluster	Mahwelereng Cluster	Modimolle Cluster	Thabazimbi Cluster
CONTACT	All up except Murder, Robbery and assault	All down but high volumes in assault	Assault Robbery up	All up except Murder,assault common	Sexual, robbery common gone up
CONTACT RELATED	Arson gone up	All down but high volumes of Malicious damage	Arson Malicious gone up	Arson ,Malicious damage gone up	All Down
PROPERTY/Thabazimbi	Stock theft gone up	Burglary residential gone up	Theft out of motor vehicles Gone up	Burglary ,Theft out of motor vehicles, Stock theft gone up	Theft out of motor vehicle gone up
CRIME DEPENDENT ON POLICE	Driving under influence gone up	Drug related gone up	Drug related Driving under influence gone up	Drug related gone up	Driving under influence gone up
OTHER SERIOUS	Shoplifting Kidnapping gone up	Commercial Gone up	Thefts not categorized gone up	All thefts not categorized Gone up	Car and truck hijacking gone up
OTHER RELATED WITH ROBBERY	None	Kidnapping	Crimen Injuria	Car and Truck jackings	Public violence Culpable Homicide

Department of Safety, Security and Liaison Limpopo 2011

TYPES OF CRIMES IDENTIFIED:

- **related to Robbery** : Carjacking, Truck hijacking, Cash in transit robbery, Bank robbery and robbery in business and at residential premises.
- **Contact Crimes** : crimes against person-Murder,total sexual offences,assault,robbery .
- **Contact Related** :Arson and malicious damage.
- **Property Related**: Burglary, Theft .
- **Crime Detected as result of Police Action**: Illegal possession of fire arms and ammo, Driving under influence of alcohol or drugs.
- **Other Serious Crimes**: All theft not classified elsewhere, Commercial crimes, shoplifting.

9.5 Fire and Rescue Services and Disaster and Risk Management Challenges

- Lack of Financial support;
- Lack of Reserves or stockpiling of long lasting equipment/relief resources;
- Lack of Skilled personnel & Disaster Risk Management Units OR Insufficient personnel;
- Lack of Integrated Two-Way Communication System across the Waterberg District;
- Lack of Participation & commitment of Sector Depts. to Disaster Risk Management;
- Lack of Awareness campaigns & Community Participation; and
- Lack of Administrative cohesion at the District and Local level (i.e. third sphere of Government).

SDCS: FIRE SERVICES	
CHALLENGES	PLAN
Serious staff shortage throughout the district	To have minimum of 25 Fire personnel per each local municipality by 2019/20 financial year to address minimum staffing level as required by National Fire Codes, To make budget provision for new posts to address the problem.
Shortage of Fire Stations in Mookgophong and Thabazimbi, Fire Engines are parked under the trees which expose them to theft, Fire personnel do not have a place to stay or work in.	For WDM to negotiate donation of land to build fire stations in Mookgophong and Thabazimbi, Negotiate buying/renting the existing ones.
None compliance to Fire Operations and Fire Safety Legislations and Codes in terms of response and fire safety	To establish efficient Fire Safety section to address all fire safety challenges, To appoint competent personnel, To train existing staff members,
Lack of supervision to fire personnel. Non implementation of Fire Service Tariffs	To relocate all fire fighters from Local Municipalities to the District by 2016, so as to get proper supervision and training.
Fire related issues not properly addressed.	Relevant Fire Professionals given an opportunities to handle fire fighting issues

9.6 POST OFFICE AND TELECOMMUNICATION SERVICES

The Modimolle Local Municipality has two post offices and four retail postal agencies. The current postal services are strategically well located and sufficient for the existing demand within the municipality. These facilities must receive regular maintenance to ensure that the facility stays in usable condition.

LEPHALALE - SPORTS FACILITIES

Sports facilities in both Onverwacht and Marapong are privately owned. Mogol sport centre and Marapong stadium are the two facilities which are available to the community in the urban area. There are public parks with children playing equipment in the urban areas. Some of these parks are maintained although the standard in Marapong is lower as compared to the one in Onverwacht and town. There are only two parks and the third is nearing completion in the entire rural villages although the majority of the population resides in those settlements. There are two enclosed sports field at Ga-Monyeki village and Thabo-Mbeki Township which cater for sporting activities for the community in rural areas. These facilities have been erected some years ago but their standard is not satisfactory.

The third facility was erected at Ga-Seleka village but has since collapsed before it could even be opened to the public. The enclosed sports field in Thabo-Mbeki has been closed to the community as the ablution has been vandalized but nevertheless it is been utilized without permission.

BELA BELA

Location	Facilities	Constraints and Challenges
Bela Bela Township	- Bela Bela Community Hall i.e. Performing Arts and Culture. - Sporting amenities i.e. Netball, Volleyball, Basket Ball and Tennis Court. - SUNFA "stadium" - Moloto Str "stadium" - Bela Bela High Stadium - Three Community Park 1 Cemetery facilities 1 library	- The Hall is multi – functional because it is also booked for special events and it is not always readily available for sports, arts, culture and recreational activities. - The sporting amenities indicated on the column for facilities are the only sporting code facilities available at the municipal level and they is a lot of pressure they encounter due to overuse as a result the facilities are deteriorating very quickly. - The long distance travelled by individuals who stay in the remote parts of the township. - The condition on the football grounds (stadium) is not satisfactory. The parks do not have the ablution facilities and lights.
Bela Bela Town	- Jinnah Community Hall - Spa Park Community Hall 1 library	Lack of sports Facilities
Pienaarsriver	Community Hall/Park	Lack of Facilities
Masakhane	1 Cemetary facilities	Lack of facilities
Rus de Winter and Rapotokwane	- Community Hall - Sport Ground 1 library	These facilities are only located within Rapotokwane.

DISTRICT WIDE LIBRARY INFRASTRUCTURES

NAME OF DISTRICT & LMs	BASELINE/STATUS QUO
Bela-Bela LM	1 library
Lephalale LM	3 libraries
Modimolle LM	2 libraries
Mookgopong LM	2 libraries
Mokgalakwena LM	4 libraries
Thabazimbi LM	2 libraries

CHALLENGES

Provision of libraries as per norms and standards.

IMPLICATIONS

- Training to be intensified on oversight structures
- Proceed with Districtwide shared services approach
- Provision of one Library per 10 000 Household

10. KPA 3 – LOCAL ECONOMIC DEVELOPMENT

Local Economic Development is an approach to sustainable economic development that encourages local communities, public and private sector to work together to stimulate local economic activities that will result in an improvement in the quality of life for all.

LED aims to increase standards of living, create more and better jobs, advance skills and build sustained development for the future. It is a practical understanding of what the local area does well and what it has to offer, where its weaknesses and gaps lie as well as where threats and opportunities exist considering the needs of the local area. The main focus is enhancing competitiveness, increasing sustainable growth and ensures that growth is inclusive.

Waterberg District Municipality's economy is characterised by three active sectors, namely Mining, Tourism and Agriculture. The District is one of the major mining regions within South Africa of which platinum, iron ore, coal and diamonds are mined. The District is also home to internationally renowned icons such as the Biosphere Reserve. The fertile soil lead to a competitive advantage in the agricultural sector and opportunities within this sector still needs to be take advantage of to their full potential, agro-processing, agri-tourism. The area has variety of natural resources, and has the potential to create countless opportunities for the local population to encourage entrepreneurship and economic development.

In support of the above statements the Presidential Infrastructure co-ordination commission (PICC) was inaugurated in September 2001, bringing in key Ministers, Premiers and Mayors for the first time into a joint forum to promote infrastructure co-ordination and decision making. Resulting from the PICC work plans for future projects and infrastructure initiatives from state owned enterprise, national, provincial and local departments have been clustered, sequenced and prioritised into 18 strategic integrated projects (SIPs). Together these SIPs unlock the economic development and maximise the returns on investment in the form of increased jobs, growth and economic potential. This will be a continuous process creating a pipeline of projects into the future that gives substance to the long term NDP, and certainty to South Africa's Development.

The Waterberg District Municipality's LED strategy will be realigning its plans with SIP 1, as indicated below.

SIP 1: Unlocking the northern mineral belt with Waterberg as the catalyst

- Unlock mineral resources.
- Rail, water pipelines, energy generation and transmission infrastructure.
- Thousands of direct jobs across the areas unlocked.
- Urban development in Waterberg - first major post-apartheid new urban centre will be a “green” development project.
- Rail capacity to Mpumalanga and Richards Bay.
- Shift from road to rail in Mpumalanga.
- Logistics corridor to connect Mpumalanga and Gauteng.

Primary Mineral Reserves	
Coal	18 bn tons
Chromite	5,5 tons
Platinum	6 323 tons
Palladium	3 611 tons

There is a functioning Business Development Forum which provides a good platform for the district municipality, local municipalities, sector departments and the private sector to interact and align economic development programmes to ensure synergy and have a greater impact. Some local municipalities have functioning LED and tourism clusters, namely Mogalakwena, Thabazimbi and Iphalale municipalities.

1.Key sectors contributing towards the economy of the municipality,

- Mining
- Agriculture
- Tourism
- Manufacturing

1. Mining

- Mining activities are around Mokopane, Lephalale, and Northam-Thabazimbi.
- Mining creates job opportunities within the District.
- The Medupi Power Station which is built by Eskom near Lephalale have influence on the future development of the region.

The mining industry in the municipal area contributes to the economic development of the District and Province. Waterberg area is the largest production area of platinum in the Province. Mining of coal and petroleum development in Lephalale has increased demand for the commodity for electricity generation. The coal resource in the Waterberg field is estimated at 76 billion tons, which is more than 40% of the national coal reserve. Minerals found in the district include chrome, platinum, nickel, tin, tungsten, coal, iron and many other metals that saw area flourishing in the mining industry. Mining is the highest GDP contributor in the district by 47, 4%, and Waterberg is the district which contributes the most towards national mining sector.

Developmental Potential

- Beneficiation
- Mining – Tourism
- Platinum Corridor
- Mining logistics hub

2. Agriculture

Agriculture is a sector which many people rely on for employment. Major crops in the district include cotton, sunflower, tobacco, and soya beans. The district is predominantly rural with virgin fertile soil and good climate presenting a competitive advantage in the agricultural sector and opportunities which still needs to be realized to their full potential.

Although named the Waterberg the district is actually classified as a semi-arid area with poor water resources. For crop farmers there have been dramatic changes in many commodity prices leading to changes in cropping patterns. Crops such as cotton, tobacco, maize and sorghum have been badly affected by low international prices and over production and plantings have been reduced significantly, often with negative financial and employment implications. Alternative crops like sunflower, wheat, soya beans, groundnuts and paprika are all internationally traded commodities and thus sensitive to the rand/dollar exchange rate.

These crops therefore are limited substitutes. Lucerne appears to have some potential, especially with the movement towards game ranching, although demand is sensitive to seasonal conditions. Potato production also has some potential although entry is constrained by high input costs. In general there is little cropping that takes place without some form of irrigation. With demand on water resources increasing consistently crop farmers are going to have to examine their returns on the use of water in future.

The cattle and game industry is undergoing significant transformation. Lead by water constraints, areas previously under dry land and irrigation are being consolidated and converted for extensive livestock production. Similarly other former cultivated land and livestock grazing is being converted to game ranching and eco-tourism. Even within the game ranching industry owners are diversifying into lodges and eco-tourism. This general trend has been encouraged by the establishment and development of the Waterberg Biosphere. This trend is expected to continue.

Development Potential

- Game farming
- Agro-Processing
- Meat & Horticulure Cluster
- Agro-Tourism

Extensive livestock production (**beef, sheep and goats**) is the largest enterprise within the sector and is best suited to the greater portion of the Waterberg District area. Significant agricultural enterprises include: **milk production, game, citrus, hydroponics, irrigated vegetable production, poultry, grapes etc.**

3. Tourism

The area of Waterberg is also blessed with rich history and cultural heritage resources that have potential for tourism. The Waterberg tourism sites include the following:

- Waterberg Biosphere Reserve- received its international status in March 2001 and now forms part of the World Network of biosphere reserves, registered with UNESCO. The Waterberg Biosphere Reserve is the first “ savannah” biosphere reserve registered in Southern Africa;
- The Makapan Caves (Valley) - is a site for one of the most dramatic incidents in the long and fascinating local history near Mokopane town in the Mogalakwena Local municipality. This cooking pot reached a boiling point between the Voortrekkers and the local Ndebeles. The Voortrekkers, which by the 1850s were already well established as far as Schoemansdal near Soutpansberg, used the local area as a thoroughfare. The Makapan Valley was declared as one of the first National Heritage Sites of the new united nation-an act supported by all local communities. In fact, current Chief Mokopane made contributions towards the development of the site as a cultural shrine and tourism icon. The application for the World Heritage Status has been approved by UNESCO.
- Nylsvley Wetland- is a registered Ramsar site (Ramsar is the international convention for the protection of wetlands). More than 400 bird species have been recorded on the 16 000ha wetland extending some 70 kilometers between the towns of Modimolle and Mokopane. The heart of the Nylsvley wetland is in the Nylsvley Nature Reserve with five modern bird hides providing perfect view and photo opportunities.

Hot Spring Water- the strong mineral springs with a flow of 220 000 litres of water per hour with a temperature of 52 degrees Celsius gave rise to the establishment of Bela-Bela (Warmbaths). The town`s progress was to a large extent due to the hot water and their healing qualities. The water from the springs is rich with sodium chloride, calcium carbonate and other salts are, amongst others, beneficial to persons suffering from rheumatic ailments. About 400 000 people visit the beautiful swimming baths of the springs annually, mainly during winter months when the climate is pleasant.

The current tourism sites are of significance for the development of the local economy. However there is a challenge that communities in the area do not participate and take the tourism competitive advantage. It is therefore important that the municipality engage in partnership with private sector to ensure that the local environment is conducive to the business environment and participation of the communities.

WDM, Local Municipalities and Limpopo Tourism and Parks established Local Tourism Associations to have a link between government and the industry; however the existence of the associations is threatened by lack of resources. A Tourism development and implementation plan is in place to guide the development and promotion of tourism and to position Waterberg as a preferred tourist destination. Black Economic Empowerment and transformation of the tourism industry is limited in the WDM. A large proportion of the tourism businesses in the region are driven by the traditional market, although gradually there is a growing interest in the tourism industry from previously disadvantaged individuals (PDI's).

Despite a growing interest in the sector from PDI's, transformation within the WDM is likely to be a challenge in moving forward. A large proportion of products in the region are family owned and run businesses and owners are therefore unlikely to be willing to provide equity ownership to “outsiders”, whether they are BEE or not.

Development Potential

- Tourism Transport Operators
- Tour Operators
- Business Tourism

- Theme parks / recreational facilities

4. Manufacturing

The following are manufactured:

- Bricks
- Steel
- Wood carving
- Dried fruits and juice production etc.

2.COMPETATIVE AND COMPARATIVE ECONOMIC ADVANTAGE

Comparative Advantages of Destination Waterberg:	Tourism investment opportunities	Agricultural investment opportunities:	Mining Investment Opportunities
Stable social environment. Availability of basic services infrastructure: health services, water and energy Readily available skilled and quality labour force (FET Colleges, Agricultural College in close proximity) Unspoiled Bushveld and existing tourism infrastructure Mineral resources Natural resources The Waterberg Biosphere Reserve – eco-tourism Lephalale Developments Proximity to the commercial capital – Gauteng	Hotels – to even up the supply of lodges and to cater for the business market Conferencing facilities in Lephalale to cater for the new business market Theme parks Recreational facilities Night life Agri-Tourism	Agri-Tourism , Agro Processing – i.e. Marula processing Organic Farming, Aquaculture	Coal deposits, Coal liquification Platinum belt in Mogalakwena and Thabazimbi area

SMME Development

The development of SMME's in municipalities must be undertaken within the policy framework of BBEE, LEGDP and the National Cooperative Development Strategy. SMME development must be focused within the competitive and comparative industries that are found in the municipal area. This is achieved by tapping in the value chain of the industries.

The Waterberg economic status has placed it at high level of competitiveness in the Limpopo Province. While, the municipality is a region still plagued with high levels of poverty and unemployment it has substantial opportunities for cooperative development in mining, agriculture and tourism. The development of

cooperative is implemented in the context of developing SMME and the two are overlapping. According to LIBSA there are 124 cooperatives in Waterberg. Their activities range mainly from catering to farming. They do not take advantage of other economic sectors mainly because of funding.

Critical challenges of developing SMME's and Cooperatives in the municipal area are limited opening of opportunities by the existing industries to communities owned by private people, lack of information, lack of entrepreneurship skills, lack of facilities and infrastructure. Education and training levels of SMME's to understand and tap into the small business development within the mining, agriculture and tourism is still inadequate.

Infrastructure Investment

Infrastructure is a very important part of any economy. The availability of infrastructure such as roads, telecommunications, railways, water and airports can in itself create economic growth and development. The existence of these infrastructures improves linkages between the supplier and the market and it also creates employment.

Economic development depends on the availability and capacity of the economic infrastructure which is found in a particular area. The Spatial Development is critical in identifying areas which are of economic potential. According to NSDP, government should deliberately engage itself in development spending. It further says that fixed investment should be both economic and social in order to support, sustain and stimulate sustainable economic and social development.

Challenges

- Poor project coordination between the district municipality, local municipalities and sector departments
- Budget constraints hindering project implementation
- Insufficient economic development personnel at local municipalities

SECOND ECONOMY – CWP, LEARNERSHIPS

Over the years Waterberg District Municipality emerged as a strong partner in the implementation of projects through labour intensive methods aligned to Extended Public Works Programme. The main objective of EPWP is to create jobs while providing skills in order to alleviate poverty within the areas where projects are implemented. The programme entails utilizing public sector budget to advance the objectives as set out by the National Department of Public Works. For the past 5 years 469 jobs were created on projects ranging from roads, paving, sewer, water etc. There are competing needs of addressing communities social needs through the provision of basic services and developing the local economy of the area. The provision of basic needs in addressing the second economy challenges plays a limited role as most of the projects implemented have a short term life span. In the case where it can absorb the unemployed and those who are not absorbed by the economic growth potential of the area it is only a limited number.

The processes of taking advantage of the economic industries that exist in the municipal area can be realized when the developed infrastructure and local economic development industries are developed in the manner they have spin off to adjacent communities. The economic investment experienced in Lephalale brings about economic spin off that will benefit the local communities immensely. It is therefore important that the District to look holistically on how the provision of

basic integrated infrastructure in the area promotes and complements economic development of the area. Strategies of acquiring strategic land and developing the local skill to enhance economic development must be developed and implemented.

The Second Economy is characterized by high unemployment and lack of skills mainly among the youth, women and people with disabilities. Despite the most progressive policy development, many of the people are poor and unemployed. It is mainly informal, marginalized, unskilled economy, populated by those who are unemployed in the formal sector. These are people who are caught in a poverty trap, unable to benefit in the growth in the first economy; and difficult to assist.

The Waterberg area is characterized by economic industries that have the potential of absorbing the second economy population. The skills development strategy of Waterberg District shows that a number of scarce skills which can help the local economy to develop are:

Jobs created through LED initiatives:

1. Community Work Programme
2. Tourism Safety Monitors Learnership district wide
3. NARYSEC district wide:
4. Youth Environment Services(YES) Project

Sector	Scarce Skill	Baseline	Required	Variance

	Horticulturists	1	180	179

Source: Waterberg District Municipality

CHALLENGES

- Compliance by local municipalities to update their registers.

OPPORTUNITIES

- Monitoring of registers will assist in creating proper jobs as per skills required.
- Local community citizens will benefit in job created.

4.WEDA WEDA's PROGRAMMINGMODEL (Core business)

BUSINESS DEVELOPMENT SERVICES:

- Financial Support Services:
- Grant access linkages, credit extension, business planning support, venture capital facilitation.
- Non-Financial Services:
- Business and technical trainings, product development linkages, market access support, technology transfer support, information linkages, business incubation support, post-funding support, compliance support, business mentorship.

INVESTMENT PROMOTION & STRATEGIC PROJECTS:

- Investment Promotion:
- Trade missions, marketing investment opportunities, facilitate bilateral trade agreements, export linkages, facilitate joint venture deals, investment retention support.

Strategic Projects:

- Infrastructural development linkages, beneficiation and value addition support, business rescue and turnaround services.

- Promote conducive business environment for investment in municipalities through infrastructure development, spatial planning and land use schemes.

TARGETING STRATEGY

The following sectors will be targeted:

- Small to medium scale enterprises trading in high-growth sectors of the district economy; particularly tourism, agriculture and mining
- Cooperatives operating in high-growth sectors of the district economy;
- Locally-based Medium to Large scale businesses and industries;
- International investors with strategic interests in high-rewarding manufacturing, mining and agro-processing projects.

PRIORITY TARGET SECTORS

Priority target sectors are categorized into first and second tier nodes:

- First tier priority sectors:
- Mining and ore beneficiation sub-sectors;
- tourism and related sub-sectors;
- Agriculture and agro-processing sub-sectors;
- Industrial & Investment Development

Second tier priority sectors:

- Small to Medium Scale sector; (Cooperative sector; Informal trading; Community services sector)
- Manufacturing and value-addition sector;
- Green and knowledge economy sectors.
- Transport and logistics
- Institution development

11. KPA 4 – FINANCIAL MANAGEMENT & VIABILITY

Financial management and viability of a municipality is core to the development of communities in a sustainable manner by providing municipal services. Within the Waterberg District financial management and viability of municipalities is fair with some challenges that must be addressed to accelerate service delivery.

REVENUE MANAGEMENT & BILLING

With powers and functions allocated to local municipalities for providing basic services such as water and sanitation, electricity and refuse removal, there are sources of revenue for local municipalities. All municipalities are generating revenue from water, electricity and property rates. It is important to note that revenue is mostly generated from towns and townships with limitations in the rural areas.

The implementation of property rates is still an inadequately tapped revenue source. The implementing MPRA is coupled by the following challenges:

- Limited collection in rural areas where the custodianship of land is in the ownership of traditional leaders.
- Limited collection in farming areas which are representative of more than 60% of the District area.
- A large amount of debtors of municipalities is other spheres of government especially the Provincial Sphere of government.

The district municipality has limited possibilities for revenue due to reduced powers and functions and therefore we are fully dependent on national grants. Currently the District municipality relies on the following grants – Equitable Share, Finance Management Grant, Municipal Systems Improvement Grant, EPWP Incentive Grant and Rural Road Asset Management Grant - to execute its powers and functions. A very small portion of our revenue is attributable to interest received on investments, abattoir income and other income. The district municipality developed a donor funding strategy and appointed a donor funder for the whole district area but this was unsuccessful in prior years.

The district municipality does not have a billing system as we are not a service authority and therefore only have minor billings on abattoir slaughtering accounts. Munsoft Integrated Financial System implemented at Waterberg District Municipality, Modimolle Local Municipality, Bela Bela Local Municipality and Thabazimbi Local Municipality does however have a functional billing system.

EXPENDITURE & CASHFLOW MANAGEMENT

The equitable share formula has been reviewed, but has not been beneficial to WDM for the coming medium term. Our cash flows are increasing by less than our fixed operating expenditure is increasing, mostly due to personnel related expenditure increasing by more than inflation. This has necessitated restrained expenditure to ensure that cash outflows remain within the affordability parameters of the municipality's finances. Waterberg District Municipality thus has to implement increased austerity measures in the 14/15 IDP and Budget due to the current revenue resources becoming insufficient to fully fund the operational requirements of the municipality. The equitable share is no longer sufficient to fund the operating expenditure of the municipality.

The shortfalls in every year on the operating budget are funded from the opening balance accumulated surplus but these funds are also being rapidly depleted. This is a major cause for concern as the indication is that we will continuously be short on the budget in future as our revenue is fixed per grants and majority of our operating expenditure is salary related which often increases by more than the CPI or relevant equitable share percentage increase. The accumulated surpluses from previous years would, as per the state of affairs currently, only be able to fund the annual operating shortfalls for this new MTREF, after which surpluses will also be depleted. This will also have a detrimental effect on the IDP as surpluses which were previously allocated to the IDP will now have to be used to fund operating shortfalls, thereby decreasing the IDP amount for projects significantly.

Property, plant and equipment is utilised to render services and for administrative support. WDM does not have infrastructure assets as we do not provide basic services other than Environmental Health and Disaster Management. The only revenue-generating asset of WDM is the Abattoir, but which is currently running at an operating loss. Surplus funds are invested in banking institutions for periods ranging from call accounts up to 6 months with the majority being invested in 60 or 90 day investments.

1. FINANCIAL POLICIES, STRATEGIES & SYSTEMS

SYSTEM/POLICY/STRATEGY	AVAILABILITY (YES/NO)
Asset management policy	YES
Credit control & debt collection policy	YES
Supply chain management policy	YES
Banking & Investment policy	YES
Petty cash policy	YES
Virement policy	YES
Catering policy	YES
Tariff policy	N/A
Indigent policy	N/A
Rates policy	N/A

Waterberg District Municipality does not have a Tariff Policy or Indigent Policy or Rates Policy as we are not a basic service authority and therefore have no billings. The immaterial tariffs we do have related to the Abattoir and Fire Fighting Services. All other policies listed above are reviewed annually, complies with relevant legislation and are implemented effectively.

2. AUDITED STATEMENTS

The performance of municipalities is measured in financial and non-financial terms. The performance of municipalities to achieve good audit reports is dependent on number of factors that include internal control systems namely; Budget, IDP, SDBIP, PMS and compliance to GRAP Standards.

The Auditor General's audit function was mostly focused on financial information with additional focus on non-financial information that also determines the extent that municipalities are delivering services in an efficient, effective and economic manner, but an audit opinion is not yet issued on non-financial information. Past outcomes on the audit reports was thus based on the fair presentation information disclosed in the municipality's financial statements and not on the performance of the municipality.

The current status quo of audit reports in the district has been shadowed by disclaimer, qualified and unqualified audit reports. Factors that have led to negative audit outcomes relate to capacity of Budget and Treasury Offices, poor record management and lack of a proper audit trail, outstanding reconciliations, inadequate financial management systems, difficulty in ensuring asset registers are GRAP compliant.

MEASURES TAKEN IN ADDRESSING THE AUDIT REPORT.

Auditor General's Reports per Municipality

Municipality	2010/11	2011/12	2012/13	2013/14	2014/15
Bela-Bela	Disclaimer	Adverse	Qualified	Unqualified	Unqualified
Modimolle	Adverse	Disclaimer	Adverse	Disclaimer	Qualified
Lephalale	Qualified	Qualified	Qualified	Unqualified	Unqualified
Mogalakwena	Unqualified	Unqualified	Qualified	Unqualified	Disclaimer
Mookgophong	Qualified	Qualified	Qualified	Qualified	Qualified
Thabazimbi	Unqualified	Disclaimer	Disclaimer	Adverse	Disclaimer
Waterberg	Clean	Clean	Qualified	Unqualified	Unqualified

To address issues raised by the Auditor General

The systems are in place and the policies implemented. The Risk register also assist the municipality address issues of risk. Office of the municipal manager, audit unit, has a plan in place to assist the municipality in dealing with issues raised. The CFO forum needs to be effective in assisting the local municipalities to improve their financial status.

COMMITTEES IN THE SUPPLY CHAIN MANAGEMENT

1. **BSC** – Bid Specification Committee
2. **BAC**- Bid adjudication Committee
3. **BEC**- Bid Evaluation Committee

3. FINANCIAL MANAGEMENT & VIABILITY: KEY ISSUES & CHALLENGES

- Ageing infrastructure in towns
- The District Municipality is almost 100% dependent on Government grants

- Insufficient financial resources to provide water, electricity, sanitation, solid waste, sports & community facilities
- Inadequate indigent registers
- Limited capacity to repay loans at normal interest rates by some municipalities
- Inadequate staffing of budget and treasury offices and high turnover of CFO's
- Inadequate project management and supply chain management systems
- Inadequate costing and specifications of budgeted projects
- Many municipalities are under financial distress
- Challenges with knowledge and information management.
- Inaccurate data on billing systems resulting in incomplete or inaccurate billing and bad debts.
- None implementation of revenue enhancement strategies
- Lack of funds for capital expenditure to support the economic growth of the area
- Large indigents base
- Municipalities have high levels of debt: None payment of services by government, private business and the community
- Debt collection in previously black townships is a challenge.
- Inadequate skills base in the budget and treasury unit.
- Ineffective Internal Audit unit and audit committee
- Non implementation of risk and anti-corruption strategies
- Although there is improvement, there are still negative audit opinions
- Increase in debt
- Difficulty in identifying related parties in SCM procurement transactions
- Implementation of residual values and lifespans of assets while complying with MFMA & related legislations as well as GRAP standards and resolution of inconsistencies between the two.
- Classification of roads between district and local municipalities and RAL in terms of the lack of implementation of the 2004 gazette assigning responsibilities to municipalities.
- Calculation of possible contingent liability on the future implementation of the SALGA Wage Curve Agreement in the absence of Final Outcome Reports for municipalities.
- Implementation of MSCOA(READINESS)

12. KPA 5 – GOOD GOVERNANCE AND PUBLIC PARTICIPATION

(1) Relationship with traditional leadership

There are 12 traditional authorities in the District Municipality. Recognition and involvement of the traditional leaders in matters of local government yield cooperative governance between the three recognized institutions. Traditional authorities both in Mogalakwena, Lephalale and Bela-Bela municipalities play a role in development of communities. They have a representative who has occupied an office in the District Municipality. There is a good communication within the District Municipality and the Traditional leaders. The role of the authorities' in development is mostly profound in mobilizing communities and allocation of

land for residents and development. However there are challenges as consultative and involvement processes of allocating land in accordance to the LUMS have not yet yielded planned settlements with basic infrastructure in the rural areas. The District Municipality has managed to establish the District Traditional Health Practitioners Committee in line with the Traditional Health Practitioners Act No 22 of 2007. Their role is to coordinate activities of the Health Practitioners and ensure that they practice according to the four recognized practices, thus Diviner, Herbalist, Traditional Birth attendant and Traditional Surgeon. They will also be working closely with the departments to promote public health and ensure the quality of health services within the traditional health practice.

(2) Functionality of ward committees and CDW / & (3) Availability and functionality of Municipal Public Accounts Committee

	District	BELABELA	MODIMOLLE	MOGALAKWENA	MOOKGOPHONG	LEPHALALE	THABAZIMBI
Political Management Team functionality	▪ PMT forum functional. ▪ MPAC ESTABLISHED and functional however continuous capacitation still required.						
Number of established ward committees.	79	9 out of 9 wards	9	32	5	12	12
Number of functional ward committees.	79	9 out of 9 wards	9	32	5	12	12
Staff in speakers office (supporting public participation)	11 incl 4 for district	0	0	3	3	1	0 Ward & Public Participation Co-ordinator advertised)

Intergovernmental Relations (IGR)

Local government does not have the powers and functions over a range of services that communities expect. These sit with the other spheres of government. While planning for such services should be integrated into the IDP, The process is highly dependent on the cooperation, commitment and involvement of provinces and national government in municipal processes.

District Municipalities are the core of promoting intergovernmental relations for better provision of service delivery. The establishment of municipal IGR forums within the district has positive yields but still with some challenges to accelerate service delivery.

The following Fora takes place in the District:

- Mayor's Forum, Municipal Managers' Forum, CFO's Forum, Technical Forum, District Economic Planning Development Forum, IDP Managers Forum, ICT Forum, IDP REP Forum, M & E Forum, Communications Forum, District Tourism Forum, Occupational Health & Safety, Internal Auditors Forum, Internal Audit, Risk Management Forum, Traditional House, Skills Development Forum.

The following are also district wide council /committees:

- Disability, youth, older persons, aids council early childhood development (jointly with Department of Education), sports and arts council, Moral regeneration, and domestic workers.

1.6.1 Inter-Governmental Relations issues and challenges include:

- Limited participation of other spheres of government in municipal planning processes
- Inadequate linkage of different priorities of other spheres of government by municipalities and vice versa
- Inadequate participation of District municipality in sector department strategic planning session to influence priorities to address service delivery challenges.

(5)Audit, Anti-corruption and Risk management committees

Risk management units and committees have been established in all local municipalities.

(6)Internal Audit

It is a requirement by the Municipal Finance Management Act of 2003 that municipalities establish internal audit units and audit and performance Audit committees. Both the Audit and Performance Audit Committee are established in terms of the MFMA and Performance Regulation of 2001. In the main the members are 3 external people and senior management. The external members provide independent specialist advice on financial performance, efficiency, effectiveness and compliance with legislation, and performance management.

All local municipalities including the District have Audit Committees which consist of at least three persons with appropriate experience of whom the majority are not in the employ of the municipality and meet at least four times a year as is required by section 166(4). There are all necessary approved internal audit and audit committee charter in place. Risk assessments are being conducted every year with the assistance of Treasury and COGHSTA. There are mechanisms in place to respond or deal with issues raised by the Auditor General in the audit report as required by section 166(2) (c).

Internal Audit Key Issues and Challenges

- Inadequate capacity of municipalities to deal with internal audit issues
- Lack of internal and external assessments to assess internal audit activities
- Inadequate synergy between Council and both the Audit and Performance Audit Committee
- Limited achievement on compliance with key issues of legislation, the MFMA, MSA and other regulations and policies
- Limited link between the municipality's performance and performance of employees

The following are available:

1. Internal Audit & Audit Committee

- internal Audit units and audit committees established district wide

2. Anti-fraud and corruption

- All municipalities have developed the anti-fraud and corruption strategies and risk management strategies.

13. KPA 6 – MUNICIPAL TRANSFORMATION AND ORGANISATIONAL DEVELOPMENT

The delivery of services to the communities relies highly on the institutional and organisational development level of the municipality. As a Category C municipality, the Waterberg District municipality plays a coordination role of provision of services, integrated development planning, provision of bulk infrastructure as stipulated in the Municipal Structure Act of 1998.

The District Municipality has fifteen powers and functions conferred to it through section 84 sub-sections 1 of the Local Government Municipal Structures Act.

APT – Authority to Perform, PFM – Powers Performed by Municipality, ESP – External Service Provider S78 – Section 78 Process in terms of System Act Complete, SDA – Service Delivery Agreement in Place					
Functions of the municipality according to the Constitution, the Municipal Structures Act and Systems Act	ATP	PFM	ESP or Other Sphere of Govt.	S78	SDA
Air pollution	Yes	Yes	No	Yes	No
Bulk supply of Electricity	Yes	No	Yes	No	No

Bulk Water Supply	Yes	Yes	Yes	Yes	Yes
Bulk sewage purification and main sewage disposal	Yes	Yes	Yes	Yes	No
Cemeteries and Crematoria	Yes	Yes	No	No	No
Municipal roads	Yes	Yes	No	No	No
Education	No	No	No	No	No
Fire-Fighting Services	Yes	Yes	Yes	Yes	Yes
Local Economic Development	Yes	Yes	No	No	No
Municipal Abattoir	Yes	Yes	No	Yes	No
Municipal Airports	Yes	No	No	No	No
Municipal Health Services	Yes	Yes	No	No	Yes
Municipal Public Transport Planning	Yes	Yes	No	No	No
Municipal Public Works	Yes	Yes	No	No	No
Municipal Planning	Yes	Yes	No	No	No
Safety and Security	No	No	Yes	No	No
Social Development	No	No	Yes	No	No
Sports, Arts and Culture	No	No	Yes	No	No
Refuse removal, refuse dumps and solid waste	Yes	Yes	Yes	No	No

It is however not performing the following functions it is supposed to implement, namely:

Powers and Function	Challenges for none performance
Bulk supply of electricity	Awaiting the finalization of REDS
Bulk supply of water	This function is performed by local municipalities.
Bulk sewage purification works and main sewage disposal	Limited financial resources to implement
Municipal airport	There is no airport in the district
Fresh produce market	There is no fresh produce market in the district.
Municipal roads	Awaiting for the national classification of road networks
Establishment, conduct and control of cemeteries and crematoria	Limited financial resources to implement and function performed by local municipalities

The implementation of the development mandate is comprised mainly by limited financial and human resources capacity, unavailability of institutional plan, limited options to retain skilled and technical staff members and limited implementation of section 78 processes to transfer powers and functions.

To implement the powers and functions of the municipality, there are oversight committees established to ensure accountability and transparency of municipal processes. The political oversight role of council is performed by Council functionaries that are established in terms of the Municipal Structure Act.

1. Institutional Structure – Political and Administrative

It the organizational structure is comprised of seven departments.

SOCIAL DEVELOPMENT AND COMMUNITY SERVICES – CONTINUED NEXT PAGE

Councillors, traditional leaders, local municipalities, sector departments, NGOs, business people, private institutions , special groups etc				

PERFORMANCE MANAGEMENT SYSTEM (PMS)

The measurement of the outcome of integrated development planning at local government can be realized when municipalities establishes performance management systems that are integrated and seamless to the IDP. Performance management system is developed for the purpose of improving the public service (i.e. through increased economy, efficiency and effectiveness in service delivery) and to reinforce accountability, so that organisations are clearly held to account for the resource they use, and the outcomes achieved. At local government the system is consists of developing the IDP aligned to the budget, development of SDBIP, reporting, assessment, performance auditing, appraisal and community participation in monitoring performance.

There are consecutive steps taken by municipalities to develop performance management system. The development of the system is still at an infancy level as municipalities are still struggling to develop a system that entrench good governance to improve service delivery. The performance assessment is still conducted at top management level with the limitation of cascading the system to all individual employees.

Organisational Performance Management System

Waterberg District Municipality has established its automated Performance Management System in 2009 with the Service Provider, Institute for Performance Management. WDM has a Balanced Score Card. The components of a Performance Management as envisaged by section 41 of the Municipal System are in existence such as:

- Key Performance Indicators
- Measurable Performance Targets
- Monitoring of Performance
- Performance Assessments
- Regular Reporting

- Performance Agreements
- Performance Auditing

Service Delivery and Budget Implementation Plan is used as the monitoring and management which is employed to implement an IDP. The SDBIP has **252 KPIs** which are spread over the seven departments of the municipality. A performance framework and policy have been reviewed to accommodate changes precipitated by the legislation.

Individual Performance Management System

Section 54 and Section Managers sign Performance Agreements within one month of their employment. To hold them accountable they also develop their Performance Plans in line with the SDBIP, which they are review on a quarterly basis.

Those who perform outstandingly preceded by the approval of Oversight Report are entitled to performance bonuses, on condition such bonuses were budgeted for the same financial year.

Performance Management System (PMS) Key Issues and Challenges:

- Inadequate baseline information to monitor progress for implementation of IDP
- Limited involvement of communities to monitor the performance of municipalities.
- Performance management is not cascaded to all municipal employees. It is limited to top management.

3 .SKILLS DEVELOPMENT

On an annual basis the Waterberg District Municipality develops the Workplace Skills Plan and Annual Training Report, which the training committee must endorse for Council to approve before sending to LGSETA on or before 30 June. Up to date we have timeously submitted the WSP to LGSETA. On a quarterly basis, a training report is submitted to LGSETA which is used to monitor the implementation of the WSP. The training includes the development of not only lower placed employees but also senior managers, Councillors and Traditional Leaders.

The types of training interventions that are offered in the municipality are amongst others in-house training, on-the job training, workshops etc. with accredited services providers. The Municipality also encourages employee self-development by offering conditional grant (bursaries). We have employees who has managed through the conditional grant to achieve their under and post graduates qualifications.

TRAINING NEEDS IDENTIFIED – 2015/16

Division	Training identified
Infrastructure Development	• GCC contract admin and quality control • Pavement rehabilitation and maintenance • Storm water drainage

	• GIS • Routine road maintenance • Roadwork traffic management • Gravel road design construction and maintenance • Non-motorized planning and design • Design and construction of surfaced low volume roads
Social Services	• Professional Ethics: Environmental Health • SAMTRAC • Food Safety and Quality • Solid Waste Management • Occupational Health and Hygiene • Environmental Management
Corporate Support and Shared Services	• Supervisory Skills • Charging Disciplinary Hearings • Engagement through performance management • Integrating Training Needs Analysis and Assessment and Evaluation • Managing Stress and Improving Productivity • Computer Training • Organizational Development • Absenteeism and Sick leave abuse
Office of the Municipal Manager	• Audit courses • Risk Management Courses • PMS Courses • IDP courses • Leadership and Management Courses
BTO	• SCM Courses
Executive Support	Councilors Training • Basic Computer training • Roles and responsibilities of a councilor • Leadership skills • MPAC and MFMP • IDP Skills for councilor • LED Skills For Councillors • Women in leadership • Protocol and etiquette • Anti-corruption strategy • Strategic Management • Gender Mainstreaming
Planning and Economic Development	• LED short courses • ABET

4. EMPLOYMENT EQUITY

The employment equity plan intends to achieve equity in the workplace, in order to make the municipal workforce more representative and ensuring fair and equitable employment practices for employees. Furthermore, it intends to create an organizational culture that is not discriminatory, values diversity and legitimizes the input of employees. The employment equity plan and the numerical targets of the Waterberg District Municipality is implemented, in terms of the Act with the only challenge being that of recruiting people with disability.

EMPLOYMENT EQUITY CHALLENGES

- Appointment of people with disabilities in general
- Accessibility of buildings to people with disabilities

(5) SUCCESSION PLAN AND RETENTION PLAN

Succession and Retention plan are still lacking.

INSTITUTIONAL & ORGANIZATIONAL DEVELOPMENT CHALLENGES

- Inadequate institutional capacity due to lack of resources to fund the organizational structure
- Lack of service delivery by – laws and implementation
- Office space

14. SWOT ANALYSIS (STRENGTHS, WEAKNESSES, OPPORTUNITIES & THREATS)

STRENGTHS & WEAKNESSES

STRENGTHS	WEAKNESSES
➤ Performance reviews-quarterly, midyear and annually. ➤ Establishment of Audit and Performance Audit Committee. ➤ IDP Forum Functional. ➤ Highly credible IDP and highly credible SDBIP. ➤ Timeous submission of strategic documents to National and Provincial Government. ➤ Strategic economic development documents in place (LED strategies, SDF's, LUMS, ITP, ➤ Competitive advantage to attract investment ➤ Strategically located (entry point into the Province from the country's economic capital, en-route to Botswana, ➤ Proper road network systems ➤ A preferred training institution for Learners in Abattoir Sector by Red Meat Association & Dept of Agriculture	➤ Cascading of PMS to lower levels. ➤ Financial Capacity. ➤ Insufficient Staff.(Review of department structure to support the PMS,IDP and IA units) ➤ Budget constraints ➤ Lack of relevant instruments to measure district economic development & growth ➤ Non-functional GIS ➤ Unavailability of Land for development ➤ Poor/inadequate economic infrastructure (roads, rail, tourism infrastructure,) ➤ Non Implementation of Planning Guiding Tools e.g LUMS, SDF, ITP and GIS

➤ WDM Disaster Management Centres (Modimolle & Lephalale ,if fully equipped, which can integrate multiple role players and agencies as well as an information management and communication system ➤ SDCS working relationship with DEA (assisting with AQMP, capacity building-(climate change mitigation & adaptation)	➤ Shortage of human capacity in all the units ➤ Lack of Participation & commitment of Sector Depts., especially to Disaster Risk Management issues ➤ Unsound working relationship with LM's ➤ Lack of infrastructure -Fire Engines are parked under the trees which expose them to theft in some LM ➤ None compliance to Fire Operations and Fire Safety Legislations and Codes in terms of response. ➤ Lack of supervision to fire personnel. ➤ Non implementation of Fire Service Tariff
➤ Approved Policies ➤ Approved organogram ➤ Training provided as per WSP ➤ EE plan Compliance ➤ Effective ICT and legal services ➤ Filling of vacancies ➤ Low staff turn over ➤ Reviewed job descriptions STRENGTHS	➤ Old ICT Infrastructure ➤ Usage of paper ➤ Long turnaround time for filling of vacancies ➤ Outdated server software ➤ Insufficient Microsoft office license ➤ Misaligned organizational structure ➤ Downgraded from category 4 to 2 (affecting salaries of all personnel) ➤ Job evaluation and grading WEAKNESSES
➤ Political stability in council ➤ Established Governance structures/ committees ➤ Implementation of the Communications Strategy ➤ Enhanced community participation processes ➤ Promotion of social cohesion through sport ➤ Consistency in Council and Portfolio Committee meetings ➤ Tracking of council resolutions ➤ Signed Twinning Agreements	➤ Communication Policy not in place ➤ Lack of integrated planning ➤ Alignment of Portfolio Committees ➤ Separation of powers and functions ➤ Insufficient staff in the political offices ➤ Implementation of advocacy programmes by local municipalities ➤ Functionality of Ward Committees ➤ Strengthening of the oversight role (MPAC) ➤ Public Participation Strategy
➤ PMUs established in all LMs and only Mookgophong LM and Waterberg DM has outsourced the service ➤ Reduction of service delivery backlogs ➤ Provision of free basic services to indigents ➤ EPWP policy developed and adopted ➤ Positions of Directors Technical Services filled except in Mogalakwena LM	➤ Poor road infrastructure due to lack of funding ➤ Unavailability of infrastructure maintenance plan ➤ WSDP for all local need to be reviewed and adopted by councils ➤ Under spending of Infrastructure Grants funding ➤ Non reporting on EPWP by some LMs

- No use of consultants for Budgets & Reporting
- Highly trained and motivated staff
- Efficient IFMS for procurement and reporting
- SCM

- Effective SCM Policy and Procedures
- Functional bid committees
- Expenditure

- Low personnel turnover
- Effective budget controls
- Budgeting & Reporting
- Alignment of Budget, IDP and SDBIP

- Impending budget shortfall in 16/17 and very little funds available for 15/16 IDP – operational expenditure exceeds operational income from grants
- SCM
- Inadequate costing and specifications of budgeted projects resulting in delayed SCM processes*
- Non adherence to SCM procedures and timelines*
- Expenditure
- Compulsory implementation of mSCOA
- Dependent of other departments to approve invoices before payment*
- Income
- No collection of revenue due to lack of income generating services units.
- Budget & Reporting
- Compulsory implementation of mSCOA
- No Reporting resource to consolidate all reporting matters

OPPORTUNITIES & THREATS

OPPORTUNITIES	THREATS
➤ Good working relations with 3 spheres of government.	➤ Retention of staff members. ➤ Interpretation of statutes
➤ Establishment of WDM interim municipal planning tribunal ➤ Resuscitation of WEDA ➤ Investment opportunities in the three active economic sectors (Mining, Tourism & Agriculture) ➤ Economic Research Unit ➤ Spatial location of investments	➤ Non-integrated planning and fragmentation (Non alignment of strategies of district, local municipalities & sector departments) ➤ Poor participation of some local municipalities & sector departments in district programmes ➤ Poverty & greed ➤ Inadequate benefits for local communities in mining, tourism and agriculture ➤ Illegal occupation of Land ➤ Competition with private Abattoirs ➤ Poor meat inspection & classification ➤ - Poor/inadequate economic infrastructure (roads, rail, tourism infrastructure.)
➤ Partnerships – other services e.g. neighbouring districts to aid human capital capacity development initiatives, WOF, other provinces, etc ➤ Building of 2 Fire Stations in Thabazimbi and Mookgophong Locals ➤ Collaboration with DEA-cushion for mitigating air pollution and environment management issues ➤ Mining industries assisting with emergencies ➤ Revenue generation- By-law enforcement, tariffs, etc ➤ Job creation – (reservist force, volunteer units) ➤ Administration of atmospheric emission licence	➤ Some landfills (unlicensed) are located within the short distances of both human settlements and plants ➤ Some municipalities are unable to control both solid and hazardous wastes ➤ Most dumping sites have reached their capacity levels and environment is polluted-possible communicable diseases. ➤ Mining and industries threatening air quality ➤ New development enhances migration of job seekers & causes population growth consequently mushrooming of informal settlements which increases burning of domestic fuel, hazards etc.

	➤ Impersonation of EHPs by criminals who rob businesses
➤ Laptops or Tablets for Cllrs ➤ Document warehousing ➤ Aligned structure with clear line of communications ➤ Job grading disparities addressed ➤ Attraction and appointment of most suitable people	➤ Contaminating the environment ➤ Labour unrest ➤ Legal Suits ➤ Retention of staff ➤ Fruitless expenditure for re-advertisement of posts because of the turn around time for appointment
➤ Partnerships with business and or private sectors ➤ Improved communications channels ➤ Enhanced Stakeholders engagement	➤ Retention of skilled personnel ➤ Community protests ➤ Lack of funding
➤ SCM ➤ Large number of credible suppliers in the market which encourages competition ➤ Improved understanding of tender processes by bidders ➤ Income ➤ Get new clients to use Abattoir – generate more revenue ➤ Revise determinants of Equitable Share Grant formulae ➤ Budgeting & Reporting ➤ 1. Revive CFO Forums	➤ District Municipality is 98% dependent on Government grants ➤ SCM ➤ Overregulation of SCM processes by National Treasury and government that delays appointment of service providers ➤ Difficulty in identifying related party transaction in SCM procurement transaction ➤ Under/ over pricing by service providers which delays project implementation ➤ Expenditure ➤ Post office strikes and local community protests may cause the invoices to be late or missing. ➤ Income ➤ Unfunded mandates e.g. WEDA, Modimolle & Mookgophong Amalgamation

STRATEGY PHASE

WDM STRATEGIC OBJECTIVES AS CRAFTED IN THE 15/16 STRATEGIC PLANNING SESSION.

KPA 1	Objective(s)
SPATIAL PLANNING	To co-ordinate and implement spatial planning and land use management, transport planning, GIS and Environmental Impact Management

IMMEDIATE (1-2YRS)	SHORT TERM(2-3YRS)	MEDIUM TERM (3-5YRS)	LONG TERM(6YRS +)
Implementation of ITP	Transport management function at local municipalities' level	Review of the ITP	Multi-Modal Public Transport Facilities in the district
Successful implementation of SPLUMA	Identification of Land for human settlement	Acquisition of land for Development	Formalization and upgrading of informal

programme (District tribunal) Review of SDF and LUMS	development		settlement and demarcation of the settlement
Appointment of GIS Officer Development and implementation of Functional GIS	Functional GIS		Upgrading of GIS Software

KPA 2		Objective(s)	
BASIC SERVICES & INFRASTRUCTURE (INFRASTRUCTURE DEVELOPMENT)		To coordinate and monitor infrastructure development for provision of access to services	
IMMEDIATE (1-2YRS)	SHORT TERM(2-3YRS)	MEDIUM TERM (3-5YRS)	LONG TERM(6YRS +)
Sustain District Infrastructure forums Implementation of EPWP policy Implementing agent for Thabazimbi MIG projects Implementing agent for MWIG projects in Modimolle LM, Thabazimbi LM and Mookgophong LM Co-ordination of Infrastructure development within the district Co-ordination of amalgamation processes of Modimolle LM and Mookgophong LM	Development of district RRAMS Establishment of road and storm water division Appointment of technicians for capital projects unit Appointment of Technical advisor to assist on implementation of MIG projects district wide	Development of District Infrastructure master plan Absorption of RRAMS appointed graduates	Implementation of developed infrastructure master plan Sustaining the developed district RRAMS

KPA 2		Objective(s)	
BASIC SERVICES & INFRASTRUCTURE (SOCIAL DEVELOPMENT & COMMUNITY SERVICES)		To coordinate and monitor infrastructure development for provision of access to services.	
IMMEDIATE (1-2YRS)	SHORT TERM(2-3YRS)	MEDIUM TERM (3-5YRS)	LONG TERM(6YRS +)
1. MHS, 2. (Air Quality), 3. (Disaster Risk Management, 4. Review the organisational structure and evaluate jobs	Align organisational structure to the IDP Develop competencies , job profiles and evaluate jobs	Continue Review and aligned organisational structure with competencies job profiles and graded jobs	Structure with personnel that match the competencies and profile

STRATEGIC OBJECTIVES OF WEDA

- To improve the global competitiveness of the district's resource based economy by promoting strategic beneficiation and value-addition programmes."
- To bolster the district's FDI account by marketing the district's immutable investment opportunities to regional and international investment blocks;
- To advance the value-creation and job absorbing potential of the local SMME sector;
- "To develop WEDA's institutional governance, programme implementation and stakeholder coordination capabilities;
- To harness and channel public and private capital towards advancing the district's strategic infrastructural development profile;
- To build the district's human capital assets in order to strengthen its service delivery machinery;

DEVELOPMENTAL STRATEGIES AND STRATEGIC ALIGNMENT

It is a requirement that in developing a municipal integrated development plan, its strategies must be aligned to those of other spheres of government. In the language of the IDP, it is about horizontal and vertical alignment.

NDP/MTSF	LDP	WDM OBJECTIVES
8. Sustainable human settlements and improved quality of household life (NDP Chapter 8)	OUTCOME 8: Human Settlement Development: Limpopo will create functionally integrated, balanced and vibrant urban settlement through usage of all spatial planning instruments	Enforcement of SPLUMA and Implementation of spatial planning and land use policies i.e. SDF, LUMS, EMF etc.
10. Protect and enhance our environmental assets and natural resources (NDP Chapter 5)	OUTCOME 10: Environmental Protection: Limpopo to transit to an environmentally sustainable, climate change resilient, low carbon economy and just society will be well under way	Implementation of Environmental Management Plan , ICLEI LAB Wetland Programmes- Rehabilitation of wetlands, land care management, Waterberg Biosphere Management Plan
Create a better South Africa, a better Africa and a better world (NDP Chapter 7)	OUTCOME 11: Regional Integration: Collaborate with developed economies [neighbouring countries or across Provinces] for increased access to markets and resources by various industrial sectors in the province	Benchmarking, best practices, investing in Waterberg: inward and outward missions, export awareness programmes, market access linkages

NDP/MTSF	LDP	B2B	WDM OBJECTIVES
6. An efficient, competitive and responsive economic infrastructure network (NDP Chapter 4)	OUTCOME 6: Competitive Economic Infrastructure: Limpopo needs to invest in a network of economic infrastructure designed to support medium and long term economic objectives. The focus should be on road network, rail network, ICT Broadband, energy, bulk water infrastructure	Delivering Basic Services	Development of infrastructure plan to guide on implementation of infrastructure projects to address the backlogs

NDP/MTSF	LDP	BACK TO BASICS	WDM OBJECTIVES
1. A long and healthy life for all (NDP Chapter 10)	OUTCOME 2: Long and Healthy Life: Limpopo must provide primary health care to reduce mortality rates, filling of critical posts and enhancing health information systems	Putting people first. Delivering Municipal services – (basic services)	Some of the causes of deaths in Waterberg- diarrhoeal diseases (in children), poor sanitation conditions , unsafe water, etc Outbreak of diseases is also a concern-hence Environmental Health – Water quality monitoring, food safety & control. First line of defence against communicable diseases-control & monitor, prevent further occurrences MHS- Strengthening health System effectively Empowering of communities through awareness campaign
2. Protect and enhance our environmental assets and natural resources (NDP Chapter 5)	OUTCOME 10: Environmental Protection: Limpopo to transit to an environmentally sustainable, climate change resilient, low carbon economy and just society will be well under way	Putting people first. Delivering Municipal services – (basic services)	WDM due to the various mining industries, is a producer of greenhouse gases. Environmental challenges to be addressed in the 3 identified hotspots. WDMAQMP-emission inventory compiled for monitoring Integrated Waste Management Plan - will guide in monitoring of waste management system in the locals
NDP/MTSF	LDP	WDM OBJECTIVES	
Decent employment through inclusive economic growth (NDP Chapter 3)	OUTCOME 4: Decent employment through inclusive growth: Dealing with challenges of unemployment, inequality and creating a more inclusive society. Implementation of the NGP and IPAP, Limpopo Industrial Master Plan, Green Economy Plan to create jobs and grow the economy	Jobs created through local economic development initiatives: Implementation of the District LED Strategy, Sustainability of Business Development Forum, continued implementation of the CWP Programme and EPWP, ICLEI LAB Wetlands Programme, implementation of Agri-park, sustainability of SPP.	
Vibrant, equitable, sustainable rural communities contributing to food security for all (NDP Chapter 6)	OUTCOME 7: Comprehensive Rural Development: Limpopo will have rural areas which are spatially, socially and economically integrated and where there is potential for economic growth, food security and jobs as a result of agrarian transformation and infrastructure development	Job Creation & Food security: implementation of the Agri-park Programme, Capacity Building Programmes for Emerging Farmers and Land reform	

NDP/MTSF	LDP	B2B	WDM OBJECTIVES
Responsive, accountable, effective and efficient local government system (NDP Chapter 13)	OUTCOME 9: Developmental Local Government: Limpopo will enforce a developmental local government that is accountable, focused on citizen's priorities and capable of delivering high quality services consistently and sustainably through cooperative governance	Sound Institutional and Administrative capabilities	To effectively manage and improve financial sustainability A clean , accountable , transparent , responsive, effective and efficient Municipal financial management system

An efficient, effective and development oriented public service (NDP Chapter 13)	OUTCOME 12: Developmental Public Service: Need for well run and effectively coordinated provincial institutions with skilled public servants who are committed and capable of delivering high quality services		
--	--	--	--

NDP/MTSF	LDP	B2B	WDM OBJECTIVES
1. An efficient, effective and development oriented public service (NDP Chapter 13)	OUTCOME 12: Developmental Public Service: Need for well run and effectively coordinated provincial institutions with skilled public servants who are committed and capable of delivering high quality services	Sound Institutional and Administrative capabilities	Developmental Public Service: Need for well run and effectively coordinated municipalities with skilled public servants who are committed and capable of delivering high quality services
2. A long and healthy life for all (NDP Chapter 10)	OUTCOME 2: Long and Healthy Life: Limpopo must provide primary health care to reduce mortality rates, filling of critical posts and enhancing health information systems	Delivering Municipal Services	Quality Health Care for all: The district must ensure provision of quality health care for all within its jurisdiction Advocate the application of 5km radius in terms of providing health care services
3. All people in South Africa are and feel safe (NDP Chapters 12 and 14)	OUTCOME 3: All People are Safe: People living in Limpopo must feel safe at home, at school, at work and enjoy community life without fear.	Putting people first	Community safety: Municipalities in Waterberg District to conduct safety audits and develop community safety plan

NDP/MTSF	LDP	B2B	WDM OBJECTIVES
9. Responsive, accountable, effective and efficient local government system (NDP Chapter 13)	OUTCOME 9: Developmental Local Government: Limpopo will enforce a developmental local government that is accountable, focused on citizen's priorities and capable of delivering high quality services consistently and sustainably through cooperative governance.	Ensuring Good governance	To develop & implement integrated management & governance system
12. An efficient, effective and development oriented public service (NDP Chapter 13)	OUTCOME 12: Developmental Public Service: Need for well run and effectively coordinated provincial institutions with skilled public servants who are committed and capable of delivering high quality services	Putting people first	To empower the community and instill the sense of ownership for development

NDP/MTSF	LDP	B2B	WDM OBJECTIVES
Decent employment through inclusive economic growth (NDP Chapter 3)	OUTCOME 4: Decent employment through inclusive growth: Dealing with challenges of unemployment, inequality and creating a more inclusive society. Implementation of the NGP and IPAP, Limpopo Industrial Master Plan, Green Economy Plan to create jobs and grow the economy	Building capable local government	To develop attract and retain best human capital
Skilled and capable workforce to support an inclusive growth path (NDP Chapter 9)	OUTCOME 5: Skilled and Capable workforce: Limpopo will have access to education and training of the highest quality. The education, training and innovation systems should produce highly skilled labour force. R&D should be expanded.	Building a capable local government.	To develop attract and retain best human capital
Responsive, accountable, effective and efficient local government system (NDP Chapter 13)	OUTCOME 9: Developmental Local Government: Limpopo will enforce a developmental local government that is accountable, focused on citizen's priorities and capable of delivering high quality services consistently and sustainably through cooperative governance.	Good governance	To develop and implement integrated management and governance system

FIVE YEAR STRATEGIC OUTCOMES & TARGETS

Outcomes are those ultimate result and improvement that the municipality will pursue through its strategic objectives and underpinned and informed by the outcomes and priorities of other spheres of government. It is imperative that progress regarding the performance targets is assessed consistently and annually over a period of five years (its elected term) in order to correctly assess the performance of Council. On annual basis the SDBIP will include more indicators for every municipality and will be used as monitoring tool of the approved and reviewed IDP.

A huge number of KPIs and their targets will be elaborated in the SDBIPs which will be developed in June of every year.

18. INTERGRATION PHASE

Integration takes place in the form of the various sector plans which are considered when crafting strategies and identifying projects which the municipality will eventually execute.

STATUS OF SECTOR PLANS

FOCUS	15/16
Spatial Development Framework	In place and adopted by council.
Disaster Management Plan	2015/2016 review/update (as it is done bi-annually.)
Integrated Transport Plan	In place and adopted by council.
Local Economic Development Strategy	In place and adopted by council.
Communication Strategy	In place and adopted by council.
Public participation Strategy	Awaiting consolidation of inputs and approval by council

Finance Strategy	addressed in Finance Chapter of IDP (locals should have their own), IDP not found lacking so due to already strained funds available for IDP, this is not a priority project. Finance Strategy should include Revenue Enhancement Strategy, but we are fully dependent on grants.
Performance Management Framework	Reviewed 15/16FY.
PMS	No electronic system manually captured.
Service Delivery and Budget Implementation Plan	In process of review, together with IDP & Budget 15/16 FY.
Organisational Structure	In progress.
Draft 2015/16Budget	In process of review, together with IDP 15/16 FY.
Workplace Skills Plan	15/16 WSP in review process and will be submitted to LGSETA by the 30 April 2014.
Road Master Plan - infrastructure Investment framework	-
Record Management Plan	-
HRM&D Strategy	In place.
Waste Management Plan	Reviewed and submitted to LEDET for approval by MEC.
Fraud Risk Management Strategy -Whistle blow policy -Fraud Respond plan -Code of conduct of municipal employees and council	Reviewed (every financial year).
Financial Plan	The 15/16 Budget is the WDM financial plan (incl. MTREF).

Capital Investment Plan	In place.
Tourism Development Strategy	LED strategy in place (incorporates all the sectors).
Agricultural Strategy	
Environmental Management Plan	Reviewed and submitted to LEDET for approval by MEC.
HIV /Aids Plan	In place.
Air Quality Management Plan	Management plan and Emission Inventory Completed.
Health Plan	-
Social Crime Prevention Strategy	-
Risk management Strategy	Reviewed.
IDP	Under review, 15/16 FY.
Sport Arts & Culture	-

NB: All these sector plans are accessible at WDM and can be made available on request

APPROVAL PHASE

Draft 15/16 IDP document was noted by Council on the 30 March 2016.
